LP-Gas Notification of Seal Break

No person, firm, partnership or corporation shall use a liquefied petroleum gas liquid metering system for the sale of liquefied petroleum gas unless the system has been inspected, approved and sealed by the Director of the Division of Oil and Public Safety (OPS). Operation or use of a liquefied petroleum gas liquid metering system that has not been properly inspected and sealed constitutes a violation.

The Director of the Division of Oil and Public Safety shall be notified immediately when a new metering system is placed in service or when the seal on an operating metering system is broken for any purpose. Such systems may be operated on a temporary basis until re-inspected and sealed by the Director of the Division of Oil and Public Safety. Upon such notification, it is the responsibility of the Director of the Division of Oil and Public Safety to make a field inspection within a reasonable amount of time.

Complete this form and send it to OPS via email, postal mail or fax using the information above and also place a completed copy of this notification in the truck or in the office (for dispensers).
