Black	5689	7.3	●	14	4.7	▽	6	9.1

[1] USA mortality data based on all 50 states combined.

▲ Rate is significantly higher than corresponding rate in column to the left.
▽ Rate is significantly lower than corresponding rate in column to the left.
● Rate is significantly higher than White/Non-Hispanic rate for this sex, geographic area, and time period.
○ Rate is significantly lower than White/Non-Hispanic rate for this sex, geographic area, and time period.

HIGHLIGHTS

- In Colorado, the cumulative lifetime risk of uterine cancer is 1 in 43.
- Colorado 2002-06 uterine cancer incidence rates were 14-29% lower than U.S. rates, varying by race/ethnicity.
- During 2002-06, Hispanic and black women in Colorado had 19% and 28% lower incidence rates of uterine cancer, respectively, than non-Hispanic whites.
- Uterine cancers in Colorado Hispanic and black women are detected later than cancers in non-Hispanic white women.
- Colorado uterine cancer survival rates for regional stage cases were up from 1996-99 to 2000-03. Hispanics and blacks with localized stage uterine cancers had survival rates worse than non-Hispanic whites.
- Colorado 2002-06 uterine cancer death rates were 20% lower than U.S. rates with little change through 2007.
