2010-2011 HPP Grant Benchmarks

Vision

To create a prepared and integrated Healthcare Preparedness Program, using all means available that will enhance Healthcare Preparedness for Colorado.

Goals

- To integrate healthcare, centering on hospitals, into the emergency preparedness arena.
- To create the capability to handle surge capacity for patient numbers equal to 10% of the hospital bed population.
- To protect healthcare staff from workplace exposures during an emergency incident.

Objectives

1. The State/Territory conduct statewide and regional exercises that incorporate NIMS concepts and principles and includes healthcare systems during the current project period.
2. Please report the total number of statewide and regional exercises conducted that incorporate NIMS concepts and principles during the current project period.
3. Please report the total number of statewide and regional exercises conducted that incorporate NIMS concepts and principles and includes healthcare systems during the current project period.
    - Numerator – The number of statewide and regional exercises conducted that incorporate NIMS concepts and principles and includes healthcare systems during the current project period.
    - Denominator – The number of statewide and regional exercises conducted during the current project period.
4. The State EOC can report available beds for at least 75% of participating healthcare systems, according to HAvBED definitions, to the HHS SOC within 4 hours or less of a request, during an incident or exercise at least once during the current project period.
5. Please report in number of hours how much time it took to report available beds according to HAvBED definitions for at least 75% of participating healthcare systems, to the HHS SOC.
6. The State/Territory demonstrates the ability to query their ESAR-VHP System during a functional drill, exercise, or actual event to generate a list of potential volunteer health professionals, by discipline and credential level, within 2 hours or less of a request being issued by a requesting body or HHS SOC during the current project period.
7. Please report in number of hours how much time it took to query the ESAR-VHP System to generate a list of potential volunteer health professionals, by discipline and credential level.
8. The Awardees submits timely and complete data for the midyear report, the end-of-year report, and the final financial status report (FSR).
