Lisa:

Attached is Pure Water Solutions' proposal for a more thorough inspection of the RO unit and its components. As noted below, I would like to have the Board authorize a not-to-exceed amount of $1,000 as I believe there may be questions that develop while their technician is on-site. Other things that may be discussed include:

Change in anti-scalent and dosing procedures.

Membrane replacement options.

Change pre-filters to high quality poly-propylene filter cartridges.

Back-washable multi-media filtration addition.

I will reach out to Dean Lewis regarding the contractual matters on Monday.

Brad

Brad,

Here is a quotation for the service on Great Rock. The contractor form looks like a construction contractor agreement. There are a few things in there that will not work for us. You may want to discuss that with Dean, as that is his department.

Thank you,
Jerod Lewis
