Next Submission Due:	Report Start Date:	Report End Date:
April 15, 2012	July 1, 2010	60 days prior to the date you check the report

Start dates for future submissions:

Submission Due:	Report Start Date:
October 15, 2012	January 1, 2011
April 15, 2013	July 1, 2011

Program Performance Indicators

General Program Screening Indicators

1. Rarely or never screened at initial Pap Test

- Standard is >=20%
- Population is all women with first Pap Test done in reporting period.
- Count is number of women in the above population who reported their previous Pap Test was never done or done at least 5 years ago.

2. Unknown at initial Pap Test

- Standard is <=5%
- Population is all women with first Pap Test done in reporting period.
- Count is number of women in the above population who reported their previous Pap Test was "Patient does not know."

3. Screening Mammograms provided to women >= 50 years of age

- Standard is >=75%
- Population is all women with mammogram done in reporting period.
- Count is number of women in the above population who are age 50 and over at date of mammogram.

Cervical Cancer Diagnostic Indicators

1. Abnormal screening results with complete follow-up

- Standard is >=90%
- Population is all women with abnormal cervical screening results reported in reporting period.
- Count is number of women in the above population with completed follow up.

2. Abnormal screening results; time from screening to diagnosis > 60 days

- Standard is <=25%
- Population is all women with abnormal cervical screening results and a diagnosis reported in reporting period.
- Count is number of women in the above population with diagnosis date over 60 days from date of abnormal screening date.

Breast Cancer Diagnostic Indicators

1. Abnormal screening results with complete follow-up

- Standard is >=90%
- Population is all women with abnormal breast screening results reported in reporting period.
- Count is number of women in the above population with completed follow up.

2. Abnormal screening results; time from screening to diagnosis > 60 days

- Standard is <=25%
- Population is all women with abnormal breast screening results and a diagnosis reported in reporting period.
- Count is number of women in the above population with diagnosis date over 60 days from date of abnormal screening date.

Note: Although the Core Indicator Report does not include treatment indicators, the Centers for Disease Control and Prevention reviews treatment status information (treatment pending or started and date started) stored in eCaST. The CDC looks for treatment to begin within 60 days of the cancer diagnosis. Please update treatment information when you know it.
