NOTICE TO VENDORS

This commodity code list is based upon one developed by the National Institute of Governmental Purchasing (NIGP). The NIGP list is designed to be used by all levels of governments. As a result, the commodities listed in this book represent an all-encompassing list and are not necessarily typical of what the State of Colorado purchases.

In order to assist prospective vendors determine the possible opportunities for competing for the State's business, we conducted a survey of the State's principal procurement offices and asked for an informal assessment of what they buy. The results of this survey are shown by the assignment of a "weight" to each commodity which represents an estimate of how often each commodity is purchased.

The characters used to identify the "weights" are as follows:

F Frequent - Estimated to be procured at least quarterly.
O Occasional - Estimated to be procured at least semi-annually.
S Seldom - Estimated to be procured at least annually.
U Unknown - No known frequency of usage or procurement.

While a conscientious effort was made to assure that the weight codes are reasonably representative of the State's anticipated procurement needs, these are only estimates and are not represented as promises of commodity activity. Procurements may be made more or less frequently than indicated.

Please review the code book thoroughly and completely. Some commodities may be referenced in more than one category. Include all commodities for which you wish to compete.
