Re: Confidential Documents in the Radioactive Materials License Application for the Piñon Ridge Mill, Montrose County, Colorado

Dear Mr. Egidi,

Energy Fuels Resources Corporation (Energy Fuels) has included six documents in the Radioactive Materials License Application for the Piñon Ridge Mill that are considered to be confidential. These documents are indicated as exhibits M1 through M6 and are included in Volume 15 of the application. Below is a summary of the documents and the rationale for their confidential status.

Exhibit M1 – Security Plan: This document outlines the security force and measures to be employed at the Piñon Ridge Mill. Release of this document for public review may compromise the security of the facility and the health and safety of mill employees and the surrounding public.

Exhibits M2 through M5 – Cultural Resource Inventory Reports and Related Documents: These documents indicate the presence and location of cultural site located on and adjacent to the Piñon Ridge Mill site. Release of these documents for public review may lead to removal of cultural artifacts from the identified sites.

Exhibit M6 – Appendix B of the Reasonable Available Technology (RACT) Report: The RACT Report, including Appendix A, is presented as part of Exhibit L8 of the application which is available for public review. However, Appendix B of the RACT Report contains vendor quotes. These quotes should be kept confidential to ensure fair market practices during future bidding of the Piñon Ridge Mill construction.

Please feel free to contact me at (303) 974-2151 if you need any additional information.

Sincerely,

Zach Rogers, EIT
Environmental Engineer
