Denver, Colorado 80246-1530

Subject: Reduction - submission of occupational dose reports to the RMU

References: Cotter Corporation, RML No. 369-01 - LC 26.2.3

Dear Mr. Tarlton,

Cotter requests that LC 26.2.3 be modified to reduce the reporting of occupational doses to an annual report as suggested by your inspectors during the recent annual inspection. Cotter estimates doses to employees per the approved procedure RH-300 Occupational Dose. Maximum doses to individuals over the past five years of shutdown, remedial and demolition activities have been well below the threshold for required monitoring of 500 mrem/year in Part 4 of the Colorado regulations which is also the Cotter ALARA goal.

If you have questions or would like to discuss this request, please contact me at (719) 275-7413 ext. 212 or by email at [jim.cain@cotterusa.com](mailto:jim.cain@cotterusa.com).

Sincerely,

Jim Cain,  
Environmental Coordinator/  
Radiation Safety Officer
