Dear Mr Tarlton;

My husband and I have attended some of the Lincoln Park advisory committee meetings in Canon City. We both agree Cotter Corp, needs to be given the highest possible cleanup standards. They need to maintain a bond of at least over \$100M dollars, in order to see to it the areas that are contaminated are clean and free of their waste. A representative of this company has stated at one of the meetings, that they would like to walk away and let nature and time clean up their carelessness under Lincoln Park and the Golf club flumes. Previous actions of this Company do not give us any peace of mind. I would also request that any future public notices include the Canon City Record, since this area is directly effected.
