FREE Colorado Distribution Operator Training Series

Oxenford Consulting, in partnership with Rural Community Assistance Corporation (RCAC) and Jacobs Engineering, is proud to present a series of workshops focused on small drinking water systems. Funded by the Colorado Department of Public Health and Environment under the Small Systems Training and Technical Assistance Grant, these workshops aim to educate distribution system operators in small communities. Attendees will leave sessions with a skill set that can be brought back to their respective utilities to allow for better maintained systems resulting in consistently higher-quality water delivered to their customers.

Three courses have been developed especially for the needs of operators in rural Colorado and are described below. Colorado Distribution System Operator Certification training units will be awarded.

Courses are **FREE** for systems serving a population of less than 3,300. For larger systems, there is a fee of $200/student for two-day classes and $125/student for one-day classes. Attendance will be limited to 30 people and advance registration is required. Lunch will be provided.

Attendees are encouraged to attend all three courses. **Small system operators that attend all three courses will receive free chlorine analysis equipment.** (One colorimeter per system, while supplies last).

Colorado Distribution Operator Training Series

Water Quality and Distribution System Essentials Course 1 (two days)

This course will be taught as a two-day program and will include case studies, exercises and hands-on training. Topics to be covered are:

- Distribution system as a barrier to protect public health
- Regulatory overview
- Water quality parameters
- Key distribution system components
- Main breaks, pressure loss and emergency planning
- Disinfection: new pipes; bacti sampling; chlorine residual management
- Monitoring to protect distribution system water quality
- Implementing an effective flushing program
- Cross Connection Control
- Emergency planning
- Operator's role in providing high quality drinking water

Water Quality and Storage Facilities Course 2 (one day)

This course will be a one-day program focusing on the typical operational and maintenance aspects of storage facilities by utilizing best practices, videos and case studies. Topics addressed will be:

- Storage facility components
- Water quality in storage facilities
- Inspection of water storage facilities
- Monitoring water quality in storage tanks
- Managing water age and quality in storage facilities
- Cleaning, disinfecting and returning a tank to service

Best Practices for Maintaining Distribution System Water Quality Course 3 (two days)

This course will be taught as a two-day course reinforcing best practices in:

- Water quality monitoring
- Coliform sampling
- Chlorine residual measurement and mapping
- Disinfection and breakpoint chlorination
- Hydraulic integrity: system pressure, cross connections
- Unidirectional flushing, valve maintenance and exercising program
- Infrastructure integrity: asset management and emergency response planning
- Distribution system surveillance

Delta, Colorado

Dates:

Water Quality and Distribution System Essentials
March 6-7, 2013

Water Quality and Storage Facilities
March 28, 2013

Best Practices for Maintaining Distribution System Water Quality
April 24-25, 2013

Each workshop will be held from 8 a.m. - 5 p.m.
Lunch will be provided.

The workshops will be held at:

Bill Heddles Recreation Center (Room B)
530 Gunnison River Drive
Delta, CO 81416

Some area hotel options are listed on the next page.

Colorado Operator Certification Training Units have been approved for these courses as follows:

Training Units	Course 1	Course 2	Course 3	Total
Water Treatment	1.0	0.7	1.0	2.7
Wastewater Treatment	0.3	0.3	0.5	1.1
Industrial Wastewater	0.3	0.3	0.5	1.1
Collection	0.2	0.2	0.5	0.9
Distribution	1.4	0.7	1.5	3.6

The three-course series satisfies the minimum experience requirement for entry level operators (Class D water or wastewater, Class 1 collection or distribution) as set forth in section 100.9.7 of Regulation No. 100, Water and Wastewater Facility Operators Certification Requirements.

PRE-REGISTRATION IS REQUIRED • COLORADO DISTIBUTION OPERATOR TRAINING SERIES • DELTA, CO

Please register in advance as class size for each workshop is limited to 30 people. Priority will be given to smaller water systems. Lunch will be provided. Please complete one form for each person who will attend. You can also register online at *www.rcac.org under Trainings and Events.* Each workshop is 8 a.m.-5 p.m. Lunch will be provided. **Registration is FREE for small water systems serving population less than 3300.**

Special needs: If you have special needs addressed by the Americans with Disabilities Act, please notify RCAC at 916/447-9832 ext. 1009 at least three weeks prior to the workshop(s) you are attending, so that we may make accommodations for you.
