After speaking with Cary we anticipate each location to cost $300 which is $250.00 for labor and $50 for parts. Total for repairing 6 curb stops would be $1800.00.

Hi Cary, below are the address's I selected for you to price to complete potholing similar to what you did to John's house. If you can give me an estimate on what you think it would take to complete these so I can pass on to the District Manager. As I Mentioned on the phone utility locates need to be called in so we can determine where the curb stops are in relation to the other utilities.
