CATEGORICAL EXCLUSION DETERMINATION FOR THE DRINKING WATER PROJECT FOR THE CUCHARAS SANITATION AND WATER DISTRICT

The Water Quality Control Division of the Colorado Department of Public Health and Environment has conducted a review of the proposed drinking water project for the Cucharas Sanitation and Water District in accordance with EPA and the State of Colorado procedures for implementing the National Environmental Policy Act (NEPA) (40 CFR Part 6) and the State of Colorado NEPA-like policy (SRF Operating Agreement). The State has determined that this project is eligible for a categorical exclusion. Accordingly, the State is exempting the project from further substantive environmental review requirements under the above stated policies.

Project Description:
The proposed project is to construct a new water storage tank. The project will be funded by a Drinking Water State Revolving Fund loan in the amount of $87,000 at 2%. The project will increase the user rates by $0.64 per tap, per month.

The project by design would not increase the drinking water demand for the planning area.

Criteria for Granting a Categorical Exclusion under 40 CFR parts 6.107 and 6.505

The action proposed will ensure compliance with current and future water treatment standards. The following criteria condition the allowance of the categorical exclusion for the proposed action:

- Minor rehabilitation of existing facilities;
- Functional replacement of equipment;
- Construction of additional facilities adjacent to existing facilities which do not affect the degree or capacity of treatment by more than 30 percent of existing population.

The documentation to support this decision will be on file at the Colorado Department of Public Health and Environment, Water Quality Control Division, in Denver, Colorado and is available for public scrutiny upon request. Comments concerning this decision may be addressed to:

Scott Garncarz, Project Manager
