

Attachment F

Dear Senate Committee on Local Affairs:

I would like to express support for HB – 1212. This bill will allow for another important economic development tool to be utilized state wide, and has the ability to improve economic development projects in both rural and metro areas.

My county is located in the southeast corner of Colorado, bordering Kansas, and near the Oklahoma panhandle and Texas. The reality of economic development incentives in neighboring states is often far too real, and has created a significant impact in our area.

Economic development tools such as this will help our state to become more competitive in the national job creation market, which is desperately needed. Particularly in the rural Colorado areas.

Thank you for your support.
