

# CANNABIS HOUSE RULES

Attachment F

1. Plants, plant material and its derivatives & all work pertaining to the cultivation and maintenance of the plants should be kept separate from common areas.
2. All equipment for cultivating cannabis should be behind locked doors at all times.
3. All nutrients, fertilizers & or plant food ingredients should be treated like any other other plant cultivation product, kept out of reach of children and not in a common area preferably with the plants.
4. Keep any and all NON Legal entities/persons out of the garden area at all times this means children, family members and or friends or acquaintances. This not only good for security but it keeps unknown pests and or foreign objects out as well.
5. Any & all growing areas should have adequate air circulation at all times. It should be separate from the rest of the home ventilation system.
6. All lighting equipment should be hung and installed correctly from a support beam in the said grow area. As well as all ventilation. Refer to online & or book bound information for adequate light and air installation.
7. Keep all animals & or pets out of the grow area/s at all times. Having hair, feathers, scales and or bodily fluids in your medication is not healthy.
8. Medication consumption should be done in a discreet manner as well as location and not around children and or family members that are not a patient themselves. Minus edible medication. Which should be stored and handled separately.
9. All edible/medible cannabis should be treated as a medicine and stored based on its requirements as well out of reach of children as well as non patients.
10. Medication should not be left sitting out anywhere for any reason. You don't leave your pills and or other medication sitting around where they can be accessed by anyone. Treat this the same.
11. Medical hardware should not be left sitting out where it can be accessed by just anyone. Meaning have a safe storage place for your Bongs, Pipes, Vaporizers, Rolling Papers, Steam Rollers, Hookas, Gravity Pipe/Bong, Chilums, Sneak A Tokes, One Hitters or anything that may contain actual medicine in it or on it.
12. It is up to the patient/s who are cultivating to make sure they are not endangering the house by trying to use too much power to run the garden. As well as basic electrical knowledge.
13. No smoking of or vaporizing of cannabis near or up wind of a minor child. No leaving edibles unattended to be accidentally ingested by a minor or non patient. No giving minors cannabis in any form.
