

L.001	Changes the date that leadership has to appoint members to the standing interim committees to June 1 instead of July 1. Makes two other little technical amendments.
L.003	Makes a date change requested by the staff director of the JBC and allows DHE to satisfy the performance plan requirements by submitting and publishing CCHE's master plan and performance contracts that CCHE has with the institutions instead.
L.004	Clarifies that the annual performance report developed by OSPB for DHE will be slightly different since they'll be measuring against CCHE's master plan and performance contracts that CCHE has with the institutions instead.
L.005	This allows bills and joint resolutions that allocate any additional legislative staff resources or create or authorize any studies, task forces, or committees to be assigned to leg council as committee of reference.
L.006	This amendment strikes the requirement that all departments are audited on a nine year cycle. The auditors believe this is necessary so as to have flexibility in not auditing a department if it's not cost-effective.
L.007	Requires all seven standing interim committees to meet at least twice every year.
