**Summary of Legislation**

This bill prohibits the practice of docking the tails of dairy cattle. It does allow tail docking if the procedure is performed for a therapeutic purpose by a veterinarian using anesthetic. It is an affirmative defense to an alleged violation that the tail of a dairy cow was docked prior to the effective date of the bill. A person who violates the bill's provisions commits a class 2 petty offense, subject to a fine not to exceed \$500.

**Local Government Impact**

The fiscal note assumes that any enforcement actions taken against a person who performs a prohibited tail docking will occur at the local level. These are expected to be few in number, generating a minimal amount of penalty revenue and not requiring additional law enforcement resources.
