

During this outage the following activities will NOT be able to be performed:

Counties -

- 1) No county printed titles, whether they are release from suspense, change of ownership, duplicate titles, etc. The title transaction can still be performed resulting in a state printed title at a later date.
- 2) No pulling records from the State for citizens that may have moved into your counties. The counties can still "build" records to perform the transaction.
- 3) No pulling of emissions information from Envirotest. The emissions information can still be manually entered however.

State -

- 1) No state printed titles, whether they are release from suspense, change of ownership, duplicate titles, etc. The title transaction can still be performed resulting in a title printed at a later date.
- 2) No pulling records from VIPER for citizens that are trying to get state-issued license plates. The state can still "build" records to perform the transaction.
- 3) No pulling of emissions information from Envirotest. The emissions information can still be manually entered however.
- 4) No Pyramid transactions can be performed to include non-posts, out of state deletes, inquiries, etc.
- 5) No additional PIMS data beyond Friday, March 18th.
