## Colorado Tuberculosis Modified Accredited Advanced State Import Requirements

### Beef Breeding Cattle Import Requirements:

- All beef breeding cattle imports shall have a current Certificate of Veterinary Inspection (CVI) and obtain an entry permit number prior to entering Colorado.
- All beef breeding cattle over 6 months of age shall be caudal fold TB test negative within 60 days prior to import or originate from a TB accredited herd with the TB accredited herd number indicated on the CVI or TB qualified herd with the date of the last whole herd TB test indicated on the CVI.
- All beef breeding cattle shall be individually identified prior to movement with an eartag that denotes state of origin. The eartag may be an official USDA metal ear tag (bright tag or OCV eartag), official NAIS electronic or visual identification, or any other individual animal identification method approved by the State Veterinarian.
- No beef breeding cattle may enter Colorado from a quarantined herd or that are trace forward or trace back cattle from quarantined herds unless they meet all testing requirements from the state of origin including repeated consecutive whole herd negative TB tests and approval of the Colorado state veterinarian.

### Dairy Breeding Cattle Import Requirements:

- All dairy breeding cattle imports shall have a current Certificate of Veterinary Inspection (CVI) and obtain an entry permit number prior to entering Colorado.
- All dairy breeding cattle over 2 months of age shall originate from a TB accredited herd with the TB accredited herd number indicated on the CVI or TB qualified herd with the date of the last whole herd TB test indicated on the CVI and an individual animal negative caudal fold TB test within 60 days prior to import.
- All dairy breeding cattle under 2 months of age shall originate from a TB accredited herd with the TB accredited herd number indicated on the CVI or TB qualified herd with the date of the last whole herd TB test indicated on the CVI and shall then be quarantined and isolated at the Colorado premises of destination and caudal fold TB tested when older than 2 months.
- All dairy breeding cattle shall be individually identified prior to movement with an eartag that denotes state of origin. The eartag may be an official USDA metal ear tag (bright tag or OCV eartag), official NAIS electronic or visual identification, or any other individual animal identification method approved by the State Veterinarian.
- No dairy breeding cattle may enter Colorado from a quarantined herd or that are trace forward or trace back cattle from quarantined herds unless they meet all testing requirements from the state of origin, including repeated consecutive whole herd negative TB tests and approval of the Colorado state veterinarian.

### Feeder Cattle Import Requirements:

- All feeder cattle imports shall have a current Certificate of Veterinary Inspection (CVI) and obtain an entry permit number prior to entering Colorado.

- All feeder cattle shall be individually identified prior to movement with an eartag that denotes state of origin. The eartag may be an official USDA metal ear tag (bright tag or OCV eartag), official NAIS electronic or visual identification, or any other individual animal identification method approved by the State Veterinarian.
- All beef feeder cattle 8 months of age and younger may import to Colorado without a negative TB test providing:
  - a. They originate from a premises with a NAIS Premises Identification Number (PIN), are individually identified with an official USDA metal ear tag (bright tag or OCV eartag), official NAIS electronic or visual identification eartag, or any other individual animal identification method approved by the State Veterinarian.
  - b. The cattle originate from one premises and are identified by the state animal health official in the state of origin as not being geographically or epidemiologically linked to tuberculosis exposed cattle.
- All beef feeder cattle 8 months of age and older may import into Colorado providing:
  - a. They are caudal fold TB test negative within 60 days prior of import; or
  - b. They import to a Colorado Import Approved Feedlot; or
  - c. They are from a Accredited TB free herd with the TB accredited herd number listed on the CVI or qualified TB free herd that has completed a whole herd caudal fold TB test on all cattle 12 months of age and older within the last 12 months
- All dairy or dairy cross feeder cattle 2 months of age or older not imported to a Colorado Import Approved Feedlot shall originate from a TB accredited herd with the TB accredited herd number indicated on the CVI or TB qualified herd with the date of the last whole herd TB test indicated on the CVI or be TB test negative to two consecutive caudal fold tests, with the last caudal fold test completed within 60 days prior to import.
- No feeder cattle may enter Colorado from a quarantined herd or that are trace forward or trace back cattle from quarantined herds unless they meet all testing requirements from the state of origin, including repeated consecutive whole herd negative TB tests and approval of the Colorado state veterinarian.
