

Colorado Enhanced Rural Enterprise Zone Program

Purpose

The Enhanced Rural Enterprise Zone program provides greater financial incentives to businesses to promote and encourage new job creation in designated economically lagging rural Enterprise Zone counties.

Authority

The designation of Enhanced Rural Enterprise Zones (EREZ) was authorized under [C.R.S 39-30-103.2](#) to further support economically depressed rural counties. EREZ's are counties in an Enterprise Zone that meet two of the following five criteria:

1. County unemployment rate greater than 50% above state average.
2. County per capita income less than 75% of state average.
3. County population growth rate less than 25% of state average.
4. Total non-residential assessed value ranks in lower half of all counties.
5. County population less than 5,000.

The state promulgates a revised list of eligible counties every two years. When a county goes off the EREZ list, taxpayers who have future job creation plans in such a county may file a certification for an extension of up to five additional years to continue claiming EREZ credits based on additional job creation.
