

**New Customs & Border Regs for Vessels:  
10+2 – Tuesday, August 19, 2008; 8:00 – 10:30 a.m.**

U.S. Customs & Border Protection will soon require many more elements of data to be transmitted 24 hours prior to vessel loading. The 10+2 Rule places new legal burdens on importers and ocean carriers to submit data they currently do not provide to the agency. Join the WTC Denver and Gallagher Transport International for a roundtable discussion on how to meet the new requirements, how they will impact current business practices, what costs will be involved, what steps must a company take and how it will affect you. Free for WTC members and \$20 for non-members. To register, call (303) 592-5760.
