Introductory Notes

1. The following requirements must be respected when creating a Figure:

- 1.1 The characters and rules in the nutrition facts table shall be displayed in a single colour that is a visual equivalent of 100% solid black type on a white background or on a uniform neutral background with a maximum 5% tint of colour (B.01.450(2)).
- 1.2 The characters in the nutrition facts table
 - Shall be displayed in a single standard sans serif font that is not decorative and in such a manner that the characters never touch each other or the rules (B.01.450(3)(a)); and
 - May be displayed with larger dimensions than those specified in the applicable figure in Schedule L if all the characters in the table are enlarged in a uniform manner (B.01.450(3)(b)).

2. Selection of the appropriate format:

2.1 Standard, Horizontal and Linear Formats (B.01.454 and B.01.461)

These are the three formats for the provision of nutrient information solely for the food as sold.

The standard format is the preferred format and is to be used when there is sufficient space. The manufacturer may choose between three different standard formats:

- Standard Format
- Narrow Standard Format
- Bilingual Standard Format

The horizontal and linear formats may only be used under the specified conditions.

2.2 Simplified Standard, Horizontal and Linear Formats (B.01.455 and B.01.462):

These are the three formats for the provision of nutrient information solely for the food as sold and when at least 7 of the calories and core nutrients may be expressed as zero (B.01.401(6)).

The simplified standard format is the preferred format to be used when there is sufficient space. The manufacturer may choose between two different simplified standard formats:

- Simplified Standard Format
- Bilingual Simplified Standard Format

The horizontal and linear formats may only be used under the specified conditions.

2.3 Dual Format - Foods Requiring Preparation (B.01.456):

This is the format for the provision of nutrient information for the food as sold and as consumed (B.01.406(5)).

The manufacturer may choose between two different dual formats:

- Dual Format – Foods Requiring Preparation
- Bilingual Dual Format – Foods Requiring Preparation

Introductory Notes

2.4 Aggregate Format – Different Kinds of Foods (B.01.457 and B.01.463):

This is the format allowed for the provision of nutrient information on prepackaged products containing separately packaged ingredients or assortment of foods (B.01.406(2), B.01.406(3)(a) and B.01.406(4)).

The manufacturer may choose between two different aggregate formats:

- Aggregate Format – Different Kinds of Foods
- Bilingual Aggregate Format – Different Kinds of Foods

2.5 Dual Format – Different Amounts of Food and Aggregate Format – Different Amounts of Food (B.01.458, B.01.459 and B.01.464):

These are the 2 formats allowed for the provision of nutrient information on the basis of different amounts of food (B.01.406(7) and B.01.406(8)).

The manufacturer may choose between two different dual formats and two different aggregate formats:

- Dual Format – Different Amounts of Food
- Bilingual Dual Format – Different Amounts of Food
- Aggregate Format – Different Amounts of Food
- Bilingual Aggregate Format – Different Amounts of Food

3. Before selecting a version of the applicable format, it must be assured that:

- A larger version of the nutrition facts table cannot be accommodated in any orientation on:
 - 15% or less of the available display surface (ADS)
 - Any continuous surface of the package (B.01.451)
- The characters do not touch each other or the rules when printed (B.01.450(3)(a)).

4. Presentation of Additional Information

If the Nutrition Facts table includes other information than the core information, that information shall be displayed:

- In accordance with the order of presentation, the use of indents and the presentation of footnotes illustrated in Figures 18.1(E) and (F), 19.1(B), 33.1(E) and (F) or 34.1(B) (B.01.460(1)(a) and B.01.465(2)(a)).
- In respect of matters other than those referred to in paragraph above, in accordance with the format that is specified in the applicable figure (B.01.460(2)(a) and B.01.465(3)(a)).

Standard Format

- For the provision of nutrient information solely for the food as sold.
