Re: Colorado's Paradigm Energy and Water Option

Dear Co-Chairman Stulp and Co-Chairman Sherman:

The enclosed letter, White Paper, and news article describe how the Central Colorado Project (CCP) provides a paradigm breakthrough for correcting Colorado's escalating water and farm crisis.

I respectfully request forty minutes to brief and discuss CCP's unprecedented near and long-term capabilities for Colorado and the Southwestern Region during one of your early South Platte Task Force meetings. My briefing will include an outline of emergency legislation to quickly evaluate and implement Colorado's limited and threatened options for future droughts, growth, and climate change needs.

Thank you.

Sincerely,

Dave Miller
President
