Kelthane[®] MF EPA Reg. No. 62719-405

EPA 24(c) Special Local Need Registration SLN CO-060005
(For Distribution and Use Only in Mesa County, Colorado)

Control of Mites in Seed Alfalfa

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- All applicable directions, restrictions and precautions on the EPA-registered container label must be followed.
- Read the label affixed to the container for Kelthane[®] MF miticide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Kelthane MF according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Kelthane MF.

Directions for Use

Apply Kelthane MF as a dilute or concentrate spray using ground or aerial equipment. Apply with a properly calibrated and maintained sprayer in sufficient water to assure thorough and uniform coverage of foliage surfaces. For aerial applications, apply in a minimum of 5 gallons of spray per acre.

Pests	Kelthane MF (pints/acre)	Application Timing	Restrictions
spider mites	2 - 3 (1 - 1.5 lb ai per acre)	Apply at the first sign of mite infestation. Use a higher rate in the rate range for heavier infestations and under conditions in which thorough coverage is more difficult.	<ul style="list-style-type: none">• Do not make more than 2 applications per season.• Preharvest Interval: Do not apply within 14 days of harvest.• Using a pH modifier, adjust the pH of the spray water to pH 5 to 7 before adding Kelthane MF to the tank.• Applying Kelthane MF with some flowable fungicide products such as chlorothalonil and sulfur may result in phytotoxicity.

Note: All restrictions of the Colorado Department of Agriculture, Division of Plant Industry, governing the use of pesticides on alfalfa grown for seed must be followed by anyone making an application under this Special Local Need label.

- Do not cut the treated alfalfa seed crop for hay or forage during the year that the crop is treated.
- Do not allow the treated alfalfa seed crop to be grazed.
- Do not allow seed screenings to be used for feed.
- Treated alfalfa seed is not to be used for spouting. All alfalfa seed treated with Kelthane MF must be tagged at the processing plants "NOT FOR HUMAN CONSUMPTION OR ANIMAL FEED." It shall be the grower's responsibility to notify the seed processing plant of any seed treated with Kelthane MF.
