Kids Mobility Network provides durable medical equipment (DME) for children of families that are uninsured or underinsured. Kids Mobility Network provides a meaningful and valuable product that allows children with equipment that allows them to more effectively access their community and participate on a more equal basis with their peers. By reconditioning DME, Kids Mobility Network has the opportunity to reduce healthcare expenses to carriers including insurance companies and government payers without decreasing the benefit to the consumer.

Kids Mobility Network is not a total solution to healthcare reform, but provides a viable solution for DME. Kids Mobility Network is interested in teaming with other providers to enhance an existing proposal in lieu of filing a proposal alone.
