Since the first CPPC grant awards were made in April 2001, approximately \$26.9 million has been disbursed to health care providers. This funding has succeeded in providing medical, dental, mental health and pharmaceutical services to at least 122,746 patients in 273,172 encounters. CPPC grant awards have also made funding available for 31 construction/remodeling projects that resulted in additional or updated facilities.

We appreciate all the interest in this program and look forward to making future awards.
