

Green tip for October 9, 2007: Reduce water consumption in the workplace – educate yourself regarding water conservation.

Related Greening Government goal: Reduce water consumption by ten percent by June 30, 2012.

The Colorado Water Conservation Board (CWCB), located within the Colorado Department of Natural Resources exists to conserve, develop, protect and manage Colorado's water for present and future generations. (That is a great sustainability statement!)

The Greening Government Program is fortunate to have member of the CWCB staff, Tom Browning, serving on the Greening Government Coordinating Council. Visit the CWCB web site at <http://cwcb.state.co.us/Conservation/> for more information about water conservation in Colorado, or contact Veva McCaig at (303) 866-3339.

When planning a plumbing or irrigation project, visit the Environmental Protection Agency's Watersense program at <http://www.epa.gov/watersense/index.htm> for water-efficient product specifications such as high-efficiency toilets and faucets, and irrigation systems.

Both of these web sites and the [Governor's Energy Office](http://www.colorado.gov/energy/greening/water-conservation.asp) web site (<http://www.colorado.gov/energy/greening/water-conservation.asp>) contain water conservation tips for home and the office.

Educate yourself and others regarding water conservation.

The next Greening Government Coordinating Council meeting is scheduled for Wednesday, October 17 at 9 a.m. Details to follow.

Angie Fyfe, Greening Government Program Manager
Governor's Energy Office
