

2010 WEST OTERO TIMPAS CONSERVATION DISTRICT

West Otero Timpas
Conservation District Office

Monthly Meetings

Mission Statement

Addressing Local Concerns

Districts generate funding through local, state, and federal sources. Local citizens elect the District board to identify and address local natural resource issues. The board involves locals and experts to help develop strategic plans. The district holds open monthly meetings, publications, events, presentations to communicate with district partners and residents about district services, good conservation practices and financial/technical services.

This conservation district serves its landowners as they participate in:

Fostering Sound Range Management

Ensuring sound range management for future generations is important to conserve natural resources and improve production as well as enhance wildlife habitat.

This conservation district serves its landowners as they participate in:

Preventing Soil Erosion

Preventing erosion preserves soil productivity long term for agriculture, production, and other uses on rural lands. It also provides improved stream flows, decreases sedimentation, and improves overall water quality. Some common practices that help producers prevent soil erosion and build soil quality include no till, minimum tillage and cover cropping.

This conservation district serves its landowners as they participate in:

Protecting Water Quality and Quantity

The District provides assistance to managers, landowners, and residents with conservation practices and management tools to protect near stream areas. In addition, they work together on reducing the movement of chemicals and nutrients to streams in sedimentation or runoff. These efforts help stabilize streambanks and protect water bodies from impacts.

This conservation district serves its landowners as they participate in:
