A glance at our program offerings

B.S. in Leadership and Organizational Studies

The increasingly complicated and challenging nature of organizations has created the need for a degree program that will prepare you to address challenges in the critical areas of today's workplace: organizational behavior, organizational design and structure, psychology workplace applications, leadership communication skills, policy development, legal issues, project management and managing information and technology. You select your specialization area, such as Business Management or Public and Nonprofit Management.

B.S. in Public Management

This degree program is designed to prepare you to effectively apply core knowledge and tools in a public organization including: effective use of public resources in a dynamic setting, ethics and principles, internal and external communication strategies and techniques, human resources and labor relations. You select your specialization area, such as Public Safety.

M.S. in Organizational Leadership

This degree program focuses on a dynamic model of organizational leadership and change management on a practical and global scope, which will provide you with innovative concepts to integrate into your own unique experience. In this program you will acquire essential skills in a number of areas including: managing information and technology, motivational influence, power and empowerment, strategic planning and team building.
