The 8-hour ozone standard is written such that attainment is met if the 3-year average of the 4<sup>th</sup> max. value from each year is less than or equal to 70 ppb.

This table provides information on the 4<sup>th</sup> max. values for 2023 and 2024, the current unvalidated 4<sup>th</sup> max. value for 2025, the current 3-year average, and the max. level for 2025 in order to remain in attainment of the ozone standard. Based on the current values, projected max. possible levels for 2026 are also included.
