KGL Associates INC

◆ KGL is an experienced earthmover and hazardous waste contractor

KGL is an earthmoving and environmental construction contractor with extensive expertise in both hazardous waste and mining operations. With ten years of operational project history and over 100 years of combined project management experience, we are prepared to handle any earthmoving or industrial project, from straight forward dig and haul or overburden removal to complex hazardous waste transport. Examples of these projects include:

- ◆ Remediation
- ◆ Reclamation
- ◆ Contract Mining
- ◆ Landfill services
- ◆ Pond construction
- ◆ Compacted embankments
- ◆ Water resource facilities
- ◆ Dams

◆ KGL provides a seasoned staff for industrial, environmental and contract mining services

Through negotiated leasing arrangements, we have access to any type of "yellow" iron equipment necessary to perform. These contracts allow us to use the newest equipment at the least overall cost to you and your project. This allows us to be the most competitive contractor bringing the best value to your project. Our staff is made up of seasoned personnel who understand how to save money through their experience of moving millions of tons of dirt, rock and waste. No project is beyond our scope or capabilities.

◆ KGL places Health and Safety above all other business considerations

Our personnel are OSHA 40 hour and MSHA trained to work on both environmental and mining projects. Our OSHA EMR is well below the standard requirements and it is our philosophy to prioritize health and safety above all other business considerations.

Board of Directors

Board of Directors

Timothy S. Borden

Mr. Borden, an attorney, is currently involved in banking and commercial real estate development in the US and Europe. He has an extensive background in the manufacturing and mining industries. He served as an officer/corporate counsel for Energy Fuels Corporation and is currently Chairman of the Board of AFE, Inc and Managing Director of FDH Holdings. The foundry divisions of AFE and FDH were sold in March of 2008 with operations in the United States, Germany, England and Mexico producing gray iron castings for the automotive and appliance industries. AFE was the world's largest producer of medium sized engine blocks for the locomotive, marine and commercial generator industries. Mr. Borden also has substantial ownership interest and is Chairman of five bank holding companies with National banks in 12 towns in Wyoming, Colorado and South Dakota.

Gerald W. Grandey

Gerald W. Grandey is currently CEO and President of Cameco Corporation, an international mining company; the world's largest producer of uranium, headquartered in Saskatoon, Saskatchewan, Canada. Mr. Grandey brings over 35 years experience as a lawyer and businessman. Mr. Grandey practiced law at Holland & Hart before joining Energy Fuels, Inc., as General Counsel. He later became President of Energy Fuels, Inc. Mr. Grandey received his undergraduate degree from the Colorado School of Mines in Geophysics, and his law degree from Northwestern University.

Mark P. Kerr

Mark Kerr, President of the company, is responsible for management and direction of company activities. Mr. Kerr, a mining engineer, brings over 30 years mining experience to the company.

James A. Larson

James A. Larson is the Past President and CEO of Niugini Energy, Inc., a corporation engaged exclusively in on-shore petroleum exploration activities in Papua, New Guinea. He brings over 40 years of experience as a lawyer, businessman, and professional investor to the Company. In addition, Mr. Larson was President and COO of Western Nuclear, Inc., where he was in charge of all domestic uranium operations, as well as broad-based mineral exploration programs in Australia, Canada, and Africa. Thereafter, he was President and CEO of Energy Fuels, Inc., a privately owned but major U.S. coal and uranium producer headquartered in Denver, Colorado. Mr. Larson received his LLB (law degree) and his Bachelor of Business Administration degree from the University of Minnesota.

Marvin J. Wolf

Mr. Wolf has over 25 years experience in the construction and surface mining industries. He has been a project manager and supervisor as well as an equipment operator. Mr. Wolf's field supervision experience is combined with a thorough understanding of all heavy equipment, and he has extensive training and experience in hazardous materials handling. In addition to Mr. Wolf's extensive mining experience he has supervised and managed on two of the largest uranium mill tailings projects in the U.S., and was Project manager on a third.

Management Team

Jack Gaudern

Mr. Gaudern is one of KGL's field superintendents, responsible for the full charge responsibility of overseeing and directing activities in the field on KGL contract projects. Mr. Gaudern is proficient in the operations of heavy earthmoving and reclamation projects. He has 28 years experience managing both employee and equipment fleets. Mr. Gaudern has both ensured raw material production and completed noted reclamation projects. He has supervised the excavation, selective low-level radioactive waste decontamination, and demolition of structures for the US Dept of Energy's UMTRA project. Mr. Gaudern is a skilled equipment operator with 38 years experience and the ability to instruct his employees in the safe operation of the complete array of heavy equipment.

Steve D. Hancock

Mr. Hancock is the Health and Safety Officer. He also brings in-house surveying capabilities and construction quality control experience to the KGL construction team. He works as a surveyor in all of the western states including Colorado and Utah with expertise in sport facility complex construction. He has provided construction control support for many large civil and environmental projects using state of the art GPS, robotic and TTS surveying technology. He has additional experience in the mining sector including underground CAD management, blast superintendent, and is a certified MSHA instructor.

Zoe M. Kemler

Ms. Kemler is a service professional experienced in Partner interaction. Customer Service and technical requirements writing based experience gained through 7 years spent with Echostar Communications Corp. She serves as the office manager and apprentice earthmoving estimator.

Robert Kowey

Mr. Kowey is one of KGL's field superintendents, fully responsible for overseeing and directing activities in the field on KGL contract projects. In addition to his capabilities as a certified person on HAZWOPER projects, Mr. Kowey brings over 20 years of experience as a heavy equipment operator to the team, including mine construction and oil field work.

Stephen Wright

Mr. Wright is one of KGL's field superintendents, responsible for the full charge responsibility of overseeing and directing activities in the field on KGL contract projects. Mr. Wright is experienced in all aspects of heavy earthmoving and civil projects, including the construction of a disposal cell for radiologically contaminated material, supervision of a Quality Control subcontractors, employee supervision and direction, and assuring compliance with rigorous safety standards. In addition, Mr. Wright is an accomplished equipment operator, able to demonstrate and instruct his people in safe and productive utilization of the full range of heavy equipment

Experience

◆ Worked for many of the largest industrial and mining companies in the country

A representative list of companies that KGL and its personnel have worked for includes:

- ◆ American Gypsum
- ◆ Arch Coal
- ◆ AT & T
- ◆ Atlas Minerals
- ◆ Better Materials Corp
- ◆ CENTEX
- ◆ CEMEX
- ◆ Cyprus Amax
- ◆ MK-Ferguson (Washington Group)
- ◆ Rio Algom/BHP Billiton
- ◆ Santa Fe Pacific (Newmont)
- ◆ Southdown Industries
- ◆ Umetco
- ◆ US Silica
- ◆ Aritz Engineering
- ◆ Westinghouse
- ◆ Black & Veatch
- ◆ Western Nuclear
- ◆ CEC Engineering
- ◆ Dept of Energy
- ◆ Harding ESE
- ◆ HD
- ◆ Knight Piesold
- ◆ Mactec
- ◆ RUST (Earth Tech)
- ◆ US Corp of Engineers

◆ Worked for environmental, industrial and mining engineering firms

Safety

KGL is committed to, and is constantly striving to provide a safe and healthy work environment for all of its workers and others on our project sites.

KGL provides each employee with a comprehensive Employee Safety and Health Handbook and initial overview training upon employment with the company.

We currently have an experience modification rate (EMR) of 0.80, zero OSHA recordable cases, and our staff includes MSHA trained and certified instructors.
