April 25, 2011

Dear Mr. Rogers,

I have received the Fourth Quarter 2010 monitoring report for the Pinon Ridge Mill Site in Montrose County, Colorado. The only problems I noted are the ones discussed in the report, the solar sensor and relative humidity temperature sensor failures at Site 2. These failures occurred during the October 27, 2010 tower audit. However, it would seem that some of the Site 2 15-minute and hourly data for relative humidity temperature and solar radiation parameters should be invalidated as a result of these identified problems. Were any data invalidated? When were the sensors repaired? I noted that in the Third Quarter report, solar radiation data from August 27, 2010 through the end of the quarter on September 30 were invalidated, resulting in 63.3% data recovery for that quarter.

I also received your letter of August 30, 2010, with revisions for prior report quarters. This closes out all those issues, and those reports are now considered complete. I appreciate your thorough investigation of those comments.

Thank you for submitting this report. This letter does not include comments from the Radiation Management Section, Hazardous Materials and Waste Management Division. Mr. Phil Egidi may have additional comments.

Sincerely,

Nancy D. Chick
Environmental Protection Specialist
Air Pollution Control Division
