Minutes of the Board of County Commissioners Meeting, held on December 17, 2014 at 8:30 a.m. in the Commissioners Chambers, Alamosa County Services Center, 8900 Independence Way, Alamosa, CO 81101.

Members Present: Mike Yohn, Chair
Marianne Dunne, Vice-Chair -Absent
Darius Allen, Commissioner
Jason Kelly, County Attorney
Peter Kampfer, County Administrator
Carol Osborn, Assistant Administrator
Belina Ramirez, Office Manager

Call the Meeting to Order

Pledge of Allegiance

Additions/Deletions to the Agenda

Approval of the Agenda

If could move SLV Ecosystem to 1st appointment today.

M/S Allen/Yohn motion to approve the agenda of November 17, 2014 with change.
Motion was passed unanimously with Dunne absent.

Consent agenda Items:

Approval of General Business/Minutes

The Following Minutes were presented:
Regular Minutes- November 19, 2014
Board of Health- November 19, 2014

M/S Allen/Yohn motion to approve the Minutes of, 2014.
Motion was passed unanimously with Dunne absent.

Approval of Bills/Obligations

M/S Allen/Yohn motion to approve the Bills/Obligations
Motion was passed unanimously with Dunne absent.

Public Comment
Approval of Consent Agenda
Public Health Partnership Consultant Agreement-Kimberly Bryant
Amendment 2 to Agreement for Application Hosting & Technology Support Services
Victim Assistance and Law Enforcement 2015 Contract
Alamosa County Treasurer Report-November
SLV Fair Board Appointment—Chad Mortensen

M/S Allen/Yohn with Dunne absent motion to approve Consent Agenda
Motion was approved unanimously with Dunne Absent.

Public Hearings

Adoption of Ordinance #18 –Alamosa County False Alarm Code

FOR MORE INFORMATION SEE PUBLIC HEARING MINUTES

Commissioner Allen stated he appreciated them coming in. He is thinking they are premature adopting this today. He will motion to table this. Maybe we need to make a subcommittee with Fire Department, Police Department, and Sheriff Department. We all agree it is a problem with 182 calls in 9 months. This puts officers in danger because they become lax. They are not here to punish anyone just to reduce these calls.

Commissioner Yohn stated this has been a burden. He is concerned about not responding to calls. He agrees with Pam Stewart of keeping count and not knowing if it false or not. The owner is responsible maybe they should get another system. He did talk to Don Chapman with alarms being fire and security cannot separate them so it could be devastating. The resources we put out for the Sheriff’s Office is a lot but they have to respond to these.

Mr. Kelly stated dispatch knows whether it is a fire alarm or intrusion alarm but they can remove the fire or refine the wording. In regards to the registration do almost a permitting process so they can keep track who has one and contact information. Commissioner Allen asked if they looked at other Ordinances. Mr. Kelly stated they did. Does anyone know how many false alarm calls the city gets asked Commissioner Allen? Ms. Stewart stated they have many at the college. Don Chapman stated they get a lot of false calls from the college as well. Commissioner Allen asked if this affects ambulance calls. Not as far as what the Sheriff is talking about. They get a lot of life alert calls but they call the person first. If the County does it right this will pave the way for the City to do this stated Mr. Chapman.

m/s Allen/Yohn motion to table until they get a report from the subcommittee that will be formed.
Motion was approved unanimously with Dunne absent.

SLV Ecosystem Council

Michael Armenta and John Stump were present. They are asking for a letter of support for a USDA Grant. They are addressing illegal dumping. They got this grant last year where they
began work in Costilla and Conejos County. They are in partnership with Rural Communities Assistance Corporation (RCAC). They are going to bring in an engineer to quantify the problem and determine the extent of the illegal dumping. Phase two they want to extend to Alamosa and Saguache Counties. The deadline was moved up so they are offset on how they are doing things. They basically want to do community outreach. They may result in building a small transfer station or small dumpsters. They will report the results to them. If they get grant it will begin October 2015 to the following year. They have been in communication with the local recycling center and the Regional Landfill facilities. Christine Canaly has been in contact with the Town of Mosca, Town of Hooper, Saguache and Center. They also have talked with Jinger Tilden at Land Use. They also get calls from concerned citizens.

Mr. Stump stated if Saguache shuts down this would increase the amount of illegal dumping from that area. Subdivisions off of Highway 160 is a concern.

Jinger Tilden Alamosa Code Enforcement Officer spoke. A lot of their blight is north of 160 all up to county lines. They had their County crews clean up a lot of there. Also Deer Valley Meadows has some illegal dumping. She is in much support of this grant and for them to try to clean up blight in those areas.

Commissioner Yohn asked where the locations of this transfer stations would be. They are working with RCAC to determine this. Probably East of Alamosa is one area they are looking at.

Commissioner Allen stated he would happy to support this. How much are applying for, who is going to administer it, and where is the grant coming from. They are specific how the funds are applied. The grant is from USDA Rural Utilities Service. It is a Solid Waste Management grant. They are applying for $80,000. A percentage of that is going to go to RCAC engineer for analysis of the problem. Part of the wording of the grant requires that the majority of the grant given to staff personnel to do the outreach and education. Right now he is part time so part will be for his salary and John Stump salary. Also there is a portion to send them to IPM training. They do have a percentage going to creating outreach of newsletters and pamphlets. Hopefully they can get another grant from CDPHE to buy transfers or help with transfer stations. The SLV Ecosystem Council will administer the grant. They are working currently with Conejos and Costilla County but they want to expand it to regional especially Alamosa County because it is the hub of the community. Commissioner Allen asked about public lands especially BLM partners. He has been on a ride along with BLM. They have some funding they could provide. He would like to coordinate with schools because building behavioral change begins with students. They talked about doing an Earth Clean Up day with students and BLM.

Ms. Tilden stated she supports this and it would be helpful for those people that live off of Hwy 17 for a transfer station so they have a place to take their trash.

m/s Allen/Yohn motion to provide a support letter for SLV Ecosystem Council
Motion was approved unanimously with Dunne absent.
Alamosa County Clerk & Recorder

Liquor License Renewal for Loaf’N Jug #10

Melanie Woodward was present. She has requested background check and everything came back clear. Commissioner Yohn asked why the address change for applicant has there has been a change in ownership. They just changed where they want the license mailed to so they can put into their system and they will mail to that location.

m/s Allen/Yohn motion to approve Liquor License Renewal for Loaf N Jug #10
Motion was approved unanimously with Dunne absent.

Clerk & Recorder Report

Alamosa had a 69% voter turnout. She had to set up a drop box at the old building from October 27 through November 4th. She had two people from each affiliation there each day. They had 786 ballots dropped off there. 61 people voted in person. When went to an all mail ballot election they had to have a box to vote in person if they wanted to. 5332 voted by mail. They are settled into the new building. It depends on what is on the ballot of what the turnout will be. Commissioner Yohn asked if 69% was normal. Ms. Woodward stated it was a little up for a year like this. They always have a big turnover for the presidential election or if there is something big like when Alamosa Schools had their bond to build their new sports complex.

m/s Allen/Yohn motion to approve Clerk & Recorder Report
Motion was approved unanimously with Dunne absent

She does need a handicap accessible into her office. This is something she needs. Leaving the doors open messes with the heating she has been told.

Alamosa County Land Use
Rachel Baird was present. Cleave Simpson and Steve Vandiver were present.

Authorization for the sale of Lot 4 of the People’s Place Subdivision

She is requesting the Alamosa Board of County Commissioners to consider the proposal from the Rio Grande Water Conservation District to purchase a 2.5 acre lot known as Lot 4 of Block 1 of the People’s Place Subdivision. On October 6, 2014 the County requested the subdivision of the northernmost part of the People’s Place subdivision, a parcel formerly described as the Remainder Lot and Replat of Lot 1. It was approved by the City Council on November 5, 2014. The Rio Grande Water Conservation District expressed an interest in Lot 4 at the Board of County Commissioner meeting on October 8, 2014. Subsequently, the County ordered an appraisal from Walters and Mullins Valuation Consultants. The market value was appraised at $75,000. On December 3, 2014 a letter was received from Rio Grande Water Conservation District expressing an interest in beginning negotiations for Lot 4 and made an offer of $75,000. Subject to agreeable contract terms, I am requesting the Board of County Commissioners approve the sale and allow staff and legal to move forward with contract on the property.
Commissioner Allen checked with the Assessor and she thought it was appraised correctly. If we could work in 1st right of refusal.

Commissioner Yohn asked what the plans are for this property.

Mr. Vandiver stated they plan to build a 6000-8000 sq. ft. office for staff and a large conference room. They are conscience with the design of the building that it fits in with the buildings already here. They have hired a construction manager. They would also need a parking lot. No problem with 1st right of refusal. The District is going anywhere they need a permanent structure.

Mr. Simpson stated their facility needs to accommodate for a large capacity of over 100. They intend it to be a public building accessible to the public. It will be open to the general public.

m/s Allen/Yohn motion to approve the sale of property to Rio Grande Water Conservation and instruct to work with attorney to be under agreeable terms
Motion was approved unanimously with Dunne absent.

Alamosa County Public Health

Della Vieira was present.

1. Core Services Updates
   a. Assessment, Planning, and Communication
      i. Diedra Todd, Environmental Health Fiscal/Receptionist started 12/1/14.
      ii. Board has a copy of the agreement with Xerox for access and training of PH staff, so we could start using the system 1/1/15.
   b. Vital Records and Statistics: No updates at this time.
   c. Communicable Disease Prevention, Investigation, and Control:
      i. We are seeing an increase in influenza activity around the state and locally
   d. Prevention and Population Health Promotion:
      i. ACPHDE did not receive the grant we had applied for to support and expand CHAMP over the next 3 years. We will re-group with our community partners to assess how we can move forward-what CHAMP costs in Alamosa County, the in-kind time and resource partners contribute, how each partner could support CHAMP and what other funding opportunities might exist.
   e. Emergency Preparedness and Response:
      i. Regional Team members attended the national healthcare coalition conference in Denver last week to better guide our regional collaborations for emergency preparedness and response.
   f. Environmental Health:
      i. ACPHD had to decline a small EPA grant for mentorship in complying with national standards for retail food inspection, as we had received a larger grant through a different entity for the same activities. It turns out that both grants
were from the same source funding and we could not use both. We are free to apply for smaller grant again next year, and they encouraged us to do so.

ii. Activity for November was provided. They are kicking off their radon program. It will be paid by the State through the radon grant. They are going to announce on radio and have vouchers to test for radon.

g. Administration and Governance:
   i. Brittney will be helping us set up our chart of accounts in Xerox once we have the agreement signed and returned.
   ii. I will be completing the year-end report for our Home Health and PCP Programs in January, and will present this to the Board at our February session.

2. Home Health Program
   a. HH Clinicians served a total of 191 patients in November, including 25 admissions and 28 discharges.
   b. Director attended HH Administrator training in Denver November 20th & 21st.
   c. Team has begun preparing for State Survey visit in early 2015.
      i. Monthly quality reviews and work on identified issues and concerns.
      ii. Quarterly overview of quality improvement work
   d. HH biller identified a discrepancy in the amount paid to RNs for supervisory recertification visits, a new rate of $12 was established in August 2013 for that supervisory component, but from 1/1/14 the RNs were paid only $2 per visit. Therefore, we owe them $10 per visit through the last pay period. Affected visits range from 9 to 29 per RN. The calculated total due is $730 from 73 visits. We would like to include this back-pay in the 12/29/14 paycheck for the four RNs affected, in order to reconcile these 2014 costs in the 2014 fiscal year.

m/s Allen/Yohn motion to approve back-pay to RNs affected
Motion was approved unanimously with Dunne absent.

3. Options for Long-term Care Program
   a. Program served a total of 458 clients in November with 15 pending.
   b. Case Managers have been busy in November helping clients on the "Consumer-Directed Attendant Services Program" select a healthcare entity to manage their attendant service contracts, and to inform them that they must decide whether they wish to make healthcare available to their privately-hired attendants in compliance with the ACA. This has been an arduous task for our Case Managers, since the programs in brand new for the State of Colorado, and therefore new to our staff and our clients.

4. PCP Program
   a. PCP’s serving approx. 108 clients with personal care and homemaking services.
   b. Program scheduled training for personal care services to clients with brain injury for December.

Commissioner Allen stated he has walked around the Public Health area and there are more and more of the treadmills are being placed. He is concerned with safety and workers comp claims. He would like to call and check with CTSI their insurance carrier. Mr. Kelly stated they might implement a policy of not
going more than 2 miles an hour or something. Ms. Cox-Vieira stated all these treadmills were privately purchased.

**Alamosa County Human Services**

Catherine Salazar was present.

Statement of Revenue and Expenditures were presented. Ongoing Workload Summary Report was provided. It shows Adult Financial with 283 cases, Colorado Works with 146 cases, Food Stamps/Food Assistance with 2076 cases, and Medical Assistance with 3492 cases.

Monthly Food Issuance Report was provided. As of November they have issued YTD $5,573,195.

Recovery Collection Comparison and Child Support Collection Summary were provided. Numbers for November are just an estimate because numbers are not complete yet. The Child Support Monthly Case Count was provided.

**County Merit System Certification**

This is required on an annual basis for signature. When Human Services was in the State merit system the thought was DHS should be absorbed through the county personnel system. Counties certify that they are following merit system principles. These principles are outlined in this. She went through the personnel manual and highlighted those areas that pertain to the principles. Our Personnel Handbook doesn’t outline word for word but she outlines in relation to the principles. The only item that is not highlighted is Item C. Nowhere in our present personnel handbook does it speak to training or certification. Department of Human Services employees do receive training as mandated by our state programs. With our Child Welfare workers Certification is required as well as ongoing training. This is the one area that is not clear in our personnel manual.

Mr. Kelly stated this is the first time he seen this version. They never have been challenged on it before. Somewhere in the manual it talked about job description and he would hope there is something under the job description of certifications. Ms. Salazar stated it requires the County Commissioners signature because they make the County policies.

**m/s Allen/Yohn motion to approve Merit System Certification**

**Motion was approved unanimously with Dunne absent.**

**CCI Child Welfare Allocation Committee Survey**

The State committed this company to do a workload study to assess and analyze all the functions that caseworkers, supervisors, and case aids do with Child Welfare. The official report came out in August. It decided the State was behind and needed 574 more workers for the Child Welfare program. It was decided they would request the legislation 130 positions which equates to $1.2 million. There was discussion whether counties wanted more workers and were okay with 20%
match. This survey asks in Question 2 is if this funding is available if we would be interested and would we be able to absorb the 20%. Question 3 is if no what would our barriers be. It would be the 20% match and the Workforce Recruitment Challenge. Question 4 is if it did not require a 20% match would we take advantage of this. Yes we would never turn our back on 100% funded money.

Commissioner Yohn stated of course #4 should be the only option we would want.

Commissioner Allen stated if we said we could use two caseworkers but it states $60000 and if we hire a caseworker how would they feel about paying someone that when the other caseworkers don’t make that. She believes they pay for what we pay. They would not require to pay that amount. Do we need another caseworker asked Commissioner Allen? She spoke with Laurie Rivera. They agreed they could use another supervisor position. They have 6-7 new caseworkers with less than 2 years’ experience which requires a lot of supervision. Their first choice would be supervisor. In the event we are given a caseworker and we need county match. Her suggestion would be let’s say yes. This is a survey not a commitment so when things firm up then we can make decisions.

His position would yes on #4 stated Commissioner Yohn. It seems to come back that you said this on the survey. Mr. Kelly stated the biggest issue they have when they place kids they have to place kids outside the valley. They lose a caseworker a day or two for this visit. This creates a problem for them to respond to other cases they have here. The biggest issue is with the distance they have to travel. The new staff needs a lot of ongoing supervision. The requirements are getting tighter and tighter that requires more supervision time.

Commissioner Allen stated at the bottom it asks for comments you could say yes but they could state provided their financial allowance stated Mr. Kelly. This survey primarily addresses do we need another caseworker stated Ms. Salazar. Some counties are going to say no. A lot of small counties don’t need any more or cannot meet financially. The ideal situation would be totally funded by the State.

**Valley Wide Health Systems**

Alonzo Payne was not present. Catherine Salazar spoke. Alonzo Payne addressed the SLV DHS Directors this last month. Valley Wide is going after a $100,000 grant to develop infrastructure. There is a Neonatal taskforce developed to address pregnant moms and babies born with drug addiction. Valley Wide was going to request if Alamosa County would be interested in being a co-applicant. Three applicants are requested. Valley Wide would be one and they would need two other applicants which they would prefer two counties. She understood they require a letter of commitment to be co-applicant for this grant. This grant needs to be submitted by the end of this month. Mr. Kelly stated we don’t even have the grant. The Board needs to see exactly what it is. They have a meeting tomorrow. Mr. Kelly and Ms. Salazar will try to get a hold of him to meet tomorrow.
County Administrator

Request for additional funds to conduct Soil/Ground Radar Assessment

Mr. Kampfer stated they conducted an asbestos study. They have those results. After discussion with Western Tech $15000-$20,000 for abatement. The original asbestos study included liens, titles, and any existence of underground. We do know they had a septic system in place there. The recommendation would be in utilizing this site for any further use of the building they have a ground radar and soil assessment to determine what is there or what is not there. Currently where you have the old building it would be a parking lot. To the east would be the Judicial Facility. There are current buildings there so they are certain with that area. He is needing support for this screening.

Commissioner Yohn why would you radar the area if it is going to be a parking lot. They are doing a building and a parking lot so for this you have to do a geological study. To what extent are you going for a parking lot stated Commissioner Yohn.

Commissioner Allen stated when we are talking about this amount of money we have to do an RFP for this. They are a good firm but sometimes they think we are in we just keep reeling them in. When they throw this out the cost sometimes goes down.

Lynnea Rappold there is a program with the State called a Brownfields grant. They are in contact with them stated Mr. Kampfer. They can do a separate request for the asbestos and move on this while waiting for the other report. Depending what is there they could cap and seal and see what is there.

Mosca Wastewater Treatment Preliminary Report

Reynolds Engineering was present. They did notify the citizens of the Mosca General Improvement District of this meeting. They are taking the objectives and what has to be done to improve the system.

Commissioner Yohn asked how notices and when notices were sent out. Jinger Tilden sent out notices Wednesday or Thursday last week and physically posted notices Thursday or Friday at the Post Office and at the school.

An Environmental Report and a Preliminary Engineering Report was provided. They put together what was the best project. They have identified the costs in the report. Mr. Reynolds stated they don’t want to say this will solve the problem. What if the area grows in size will it double the facility asked Commissioner Allen? They considered a 20 year growth expansion.

Mosca needs to be involved stated Commissioner Yohn.
Board/Staff Updates

Economic Development Study

They talked about $2000 contribution because we are the largest of the Counties for SLV DRG study stated Commissioner Yohn. Only if they get the rest of the money stated Commissioner Allen. Rio Grande contributed $1700. Farm credit has put some money into, some financial institutions, DOLA will assist funding, and State Water Board will help fund this. This can come out of Community Development Funds. It will show the economic effect on solar farms. Mr. Kampfer asked if CSU Extension is contributing. Commissioner Allen stated they have no money. In other states the Extension services are funded by USDA at large and if you state this as a baseline economic study they should fund this and it should be fairly significant. He has done this in two other areas so if you route the funds through the USDA Extension. He always got up to in excess of $10,000. He could explore this farther.

m/s Allen/Yohn motion to support Economic Impact Study up to $2000 only if the rest of the money is raised

Motion was approved unanimously with Dunne absent.

Adjourn

There being no further business, the Regular Meeting of the Board of Alamosa County Commissioners was adjourned.

ATTEST:

Belina Ramirez, Office Manager

Mike Yohn, Chairman

Carol Osborn, Assistant Administrator

Marianne Dunne, Vice-Chair

Darius Allen, County Commissioner
Minutes of the Public Hearing for Ordinance #18 False Alarm Code was held on December 17, 2014 at 8:30 a.m. in the Commissioners Chambers, Alamosa County Services Center, 8900 Independence Way, Alamosa, CO 81101.

Members Present:  
Mike Yohn, Chair  
Marianne Dunne, Vice-Chair-Absent  
Darius Allen, Commissioner  
Peter Kampfer, County Administrator  
Jason Kelly, County Attorney  
Carol Osborn, Assistant Administrator  
Brittney DeHerrera, Chief Financial Officer  
Belina Ramirez, Office Manager

Dave Stong was present.

This is to address the never ending false alarms they respond to. Only one was an actual case the others were false alarm. He wants to make it safe for his employees. The time spent is phenomenal.

Mr. Kelly stated the Board requested how much it is costing the county. It is important when you are passing an Ordinance especially when you are asking people to pay a fee that you create a record to show why you are passing the Ordinance and what it is costing the County. Sheriff Stong provided a report from January 1st – October 31st that deputies responded to 182 alarm calls for service all of which the disposition of those calls were false alarms. Calculating the time into responding was 273 hours resolving and documenting which translating to $20,000 in a ten month period. The goal is not to punish anyone but reduce the number of false alarms we have. It sets up a process where a three warnings are given prior any penalty or fine be assessed. An alarm administrator through the Sheriff’s Office will keep track of the calls. The Sheriff’s Office would notify the owner and business. There is a grace period that covers a 12 month period. The 4th time a citation would be issued. Then Dispatch will not send a deputy out there unless there was an actual in person call for service. The ultimate goal is to reduce the number of false alarms so the resources of the Sheriff’s Department are utilized in the most sufficient manner.

Commissioner Yohn asked if anyone would like to speak for or against this Ordinance.

James Billings Valley Lock & Security and Pam Stewart State Dispatch were present. He spoke with Jason Kelly as far as the alarm business being involved in this. Speaking for Valley Lock & Security they do not lease their systems. When they install a system the customer purchases outright from them. They send out the contracts to Central Security. Central Security handles it from there and gets the calls and calls dispatch. They do not get the calls. They can
get into the systems to change codes and add codes. 99.9% of the time is human error. Kids are messing with pads and hit the panic buttons or messing with the key pads. There are certain numbers you can call to dispatch. One customer on the list was 78% were from Valley Lock. 20-30 calls were from Rustic Log because they change or add new employees and they do not give them the code or they change the responsible party. Valley Lock does not know that they change so it is out of their hands. As far as Valley Lock they feel they shouldn’t be responsible for any calls it should go to the customer.

Pam Stewart stated it is a good idea to stop the false alarms but she has some concerns. Just in the wording on Page 2 it says “there is no duty to dispatch in any circumstances” this will put it on her. Even though in the Ordinance it says no liability it would be put on her. She would ask to change to no duty to respond. They are going to dispatch but if they chose not respond that is fine but she has a duty to dispatch. They understand it better after talking to Mr. Kelly. In the wording it says Alamosa County dispatch so she was confused who it was referring to. She understands Dispatch will call the Sheriff’s Alarm Administrator and they will keep track of how many times they dispatched to the addresses. Sheriff Stong stated they are provided a report weekly by Dispatch so they will maintain a record of the calls. The Alarm Administrator will be appointed and the officers will decide whether to respond. She has it in the system but she is not going to be able to check when she is dispatching. In the Ordinance it says something about Fire Alarms as well. Is this something you are going to do too or is it just going to be security alarms.

A lot of these alarms focus on both fire and security but they are concerned with the security alarm stated Sheriff Stong. They are concerned with the intrusion calls. He is not aware of any false fire alarms but there probably has been some.

This can be changed stated Mr. Kelly. He asked if the call is different. They are told if it is a fire alarm, motion detector, glass breakage, or security stated Ms. Stewart. Also where the false alarm code where employee doesn’t know the code they are notified. Central Security gets the calls and if no answer then they dispatch stated Mr. Billings. They want to make sure the owner is called first stated Mr. Kelly. Sometimes the owner won’t answer calls or the owner changes their number and no one knows. This will encourage people to answer their phones or update numbers stated Mr. Kelly. Mr. Billings stated that is why it should go back to the customer or the company that leases these alarms. They do not lease theirs they sell them and they are out of the picture. Central Security calls dispatch first and notifies them they are attempting calling the responding party. It is a good 5-7 minutes between so the officer is well on his way before they can call it off.

Mr. Billings stated if this is the case is the officer already responding. Sheriff Stong stated a lot of times yes. Mr. Billings stated they will get an email or call from Central Security Rep that they need help updating their contact information. This is about one or two every four months.
Sheriff Stong asked if the Citation is being issued to the site owner. Mr. Kelly stated the alarm administrator determines if the company or the site owner is responsible. Mr. Billings stated it will not give an alarm for low battery or loss of power. Once in while the motion goes bad so it does happen.

Ms. Stewart asked if the Sheriff would prefer to change the name to Alamosa Regional Communication Center because she thought it was the Sheriff’s office when it stated Alamosa County Communication Center.

Don Chapman Alamosa Fire Protection District was present. His concern is the wording of ordinance directed to fire response. He wanted clarification and basically want it removed. He doesn’t want it to interfere with their response. He was also concerned with who the Alarm Administrator is going to be to determine responding. It should be up to them whether to respond. Sheriff Stong stated it is not fire alarms he is concerned with. He doesn’t think any fire alarm calls were false alarms. Mr. Chapman stated 15 alarm calls for Mosca and ½ were false. Sheriff Stong stated many alarms have all in one. They come through as smoke detector or fire alarm stated Mr. Chapman. Some were in Mosca and one in Deer Valley Meadows where they were false. If we tend to ignore it will become a costly response where someone else will be legally responsible for.

**There being no further business, the Public Hearing for Ordinance #18 was adjourned.**

**ATTEST:**

Belina Ramirez, Office Manager

Mike Yohn, Chair

Carol Osborn, Assistant Administrator

Marianne Dunne, Vice-Chairman

Darius Allen, County Commissioner
