BUILDING A FUTURE

YOUR HOME PACKET

ALAMOSA COUNTY

BROUGHT TO YOU BY:
LAND USE OFFICE / BUILDING DEPARTMENT
Alamosa County Department of Building Safety
Checklist for MANUFACTURED HOMES-HUD & IRC

Project Address: ________________________________ Date: ________________

Property Owner Name: ____________________________________________

THIS CHECKLIST MUST BE COMPLETED & SUBMITTED WHEN FILING A PERMIT APPLICATION.
ALL ITEMS CHECKED [NC] MUST BE SUBMITTED TO THIS OFFICE TO
CONTINUE PROCESSING YOUR APPLICATION.

Single-section Manufactured Homes may be no older than 15 years.
Multi-section Manufactured Homes may be no older than 1976.

ALL BUILDING PERMIT APPLICATIONS MUST INCLUDE THE FOLLOWING:

[R] [C] [NC] [NR] 1. Application form
□ Completed application form

[R] [C] [NC] [NR] 2. Two (2) sets of Foundation Drawings (11"x17" min. and to Scale)
□ Colorado registered design professional stamp is required
□ The drawings must be legible and to scale
□ Submit a Copy of the Sales contract
□ Submit Bid Sheet with application (labor and material)

[R] [C] [NC] [NR] 3. Additional Manufactured Home Building Plans (11"x17" preferred)
(CHECK ONE)
□ New Homes: Complete set of plans
□ Repurposed Homes: Floor Plan and Elevations

[R] [C] [NC] [NR] 4. Two (2) plot plans (11"x 17" min. Must be to scale and legible)
□ Site orientation (North arrow and scale of drawing)
□ Legal description and property address
□ Length of lot lines and property description
□ Location, shape and size of structures proposed for construction
□ Location and size of existing structures and the distance between them
□ Location and dimensions of the driveway or access to the property
  ○ (Show the county or private road access)
□ Show the utility service location (gas, water, and electrical)
□ Show the location of the wells and septic systems
□ Show setback dimensions required by the zoning ordinance.
□ Show the dimensions of the proposed setbacks.
□ Show the existing water features such as drainage, swales and creeks
□ Show easements
□ Show and label roads and streets
5. Copy of Septic Permit or Application (CHECK ONE)
   □ Alamosa County OWTS: log in #___________
   □ Mosca Improvement District
   □ East Alamosa Water and Sanitation
   □ Pre-existing

6. Proof of Adequate Water Supply (indicate Permit No.) (CHECK ONE)
   □ Well permit from (CDWR) (form GWS-25) No. ________________
   □ Completed water well application (form GWS-44) no. ________________
   □ Registration of existing well application (form GWS-12) No. __________
   □ Form letter from (CDWR) allowing use in detached garage
   □ Approval for augmented water (SLWVCD)
   □ Approval from East Alamosa Water and Sanitation (EAWS)

7. Special Use Permit for Single Wide Manufactured Home
   □ Special Use Permit Approval (Or Resolution if available)

8. Zapata Home Owners: Home Owners Association Approval
   □ HOA Letter of Approval

9. Access and Address Permit
   □ A new address must be issued with vacant land;
     * List the new address: ____________________________
     □ Alamosa County Road and Bridge Department Access Permit

10. Proof of Ownership (CHECK ONE)
    □ Warranty deed
    □ Deed of Trust
    □ Other: ____________________________

CONSTRUCTION DRAWINGS MUST INCLUDE THE FOLLOWING:

A. All typical section views:
   a. Footer, Stem Wall, re-bar (reinforcing steel) Sills, Joists, Studs, Headers (window and doors) Rafters, or Trusses, type of roofing material, pitch of the roof and roof and crawl space venting.

B. Foundations:
   a. Size and depth of the footer and stem walls, reinforcing steel, spacing of the anchor bolts and size, size of the piers and pads and the thickness of the slabs, vapor barriers and crawl space vents.

C. Floor Plans:
   a. Show room dimensions, room description, window sizes and type.

D. Framing Plans:
   a. Floor: Size, grade, spacing, span, and type of wood used.
   b. Beams and Headers: Location, spans, bearing location, size and grade and type of wood used.
   c. Roof: Engineered trusses (plans) or size of the rafters spacing, span, and type of wood used. (All trusses and engineered wood products to be used require a manufactured design and the specs attached to the plans).
   d. Elevation Views: Front, Sides, and Rear.
Isometric drawings

To help the builder visualize what the various elements of the proposed construction should look like, a designer may provide an *isometric drawing* (Figure 33). An isometric or perspective drawing provides a three-dimensional view of the building. There is no scale for an isometric drawing.

Although a building can be visualized better through an isometric drawing, it is rarely used except for plumbing plans. In plumbing plans, isometric drawings are used to indicate the vertical components of water supply and waste piping diagrams. Remember that the purpose of most other isometric drawings is to show how various elements of proposed construction will look. They should not be used for enforcement purposes.

NOTES: 1. Bend Rebar around the corners and overlap Rebar 12" min at the joints.
   2. Anchor bolts must be 1/2" x 10" min and placed no more than 12" from the corners and from splices in the sill plate.
   3. Keep the Rebar at least 3" from the bottom, sides and the top.
   4. Backfill with soil at least 10' out from the building and expose 6" of concrete from the bottom of the sill plate.

## OTHER INSPECTIONS AND FEE SCHEDULE “B”

1. Inspections outside of normal business hours .................................................. $50.00 per hour*
2. Re-inspection fees assessed under provisions of section 108.4 ...................................... $50.00 per hour*
3. Inspections for which no fee is specifically indicated ....................................... $50.00 per hour* (Minimum charge-one half [1/2] hour)
4. Additional plan review required by changes, additions or revisions to approved plans ........................................... $50.00 per hour* (Minimum charge-one half [1/2] hour)
5. Use of outside consultants for plan review and inspections or both ........................................... Actual Costs**
6. Other Fees:
   - Deck .............................................. $50.00
   - Fence (Residential) ...................................... $25.00
   - Fence (Commercial) .................................. $100.00
   - Demolition Permit (State Demolition Permit required) Residential and Commercial ............... $25.00
   - Free Standing Building (FSB); portable buildings built on skids (Max. 400 Square Feet) .......... $50.00
   - Pole Barn Building used as a garage, storage, or utility—the permit fee is based on actual cost ........................................... $10.00 per sq foot
   - Agriculture Building/ Hay Storage ........................................... $100.00
   - Residential PV (Solar) Permit Fee (attached or unattached to house) ................................ $50.00
   - Commercial PV (Solar) Permit Fee ........................................... $100.00
   - Re-Roofing, Siding, Stucco Permit ........................................... $50.00
   - Residential Greenhouse ........................................... $7.50 per sq foot
   - Sign Permit ........................................... $1 square foot with a $25 minimum
   - Temporary Permit (example: cement batch plant) ........................................... $120.00

7. Issuance of each Temporary Certificate of Occupancy (80% refund possible) ................... $200.00
8. Building without a valid permit ........................................... 100% of the original permit fee
9. Occupancy of building without a Certificate of Occupancy ........................................... 150% of original permit fee
10. Refunds approved by the building official at 80% of the original permit fee under provisions of section R108.5.

**Manufactured Homes will be assessed at 50% of the above fee schedule for the home value and evaluated at 100% of the above fee schedule for the foundation cost.

*The total hourly cost to the jurisdiction, whichever is greatest. The cost shall include supervision, overhead, equipment, hourly wages and fringe benefits of the employees involved.
and miscellaneous supporting data. This information can be obtained on a
statewide basis from the Division's Records Section located in Denver.
Their public hours are from 10:00 a.m. to 3:30 p.m., Monday through Friday.
(Please note this section is closed on the last Friday of each month for record
maintenance). Localized data, to a
limited extent, can be found in our
division field offices. Information on
ground water well permitting can also be
obtained from the Ground Water
Information desk at: (303) 866-3587.
The Division does not carry data
regarding the buying and selling of water
rights.

Are there other duties that the State
Engineer's staff perform?

Yes. Professional engineers and
geologists collect and analyze data on
water supply to forecast streamflows,
determine diversion requirements,
investigate stream transit losses,
determine evaporation losses, and
calculate historic use and current
conditions. A statewide satellite
monitoring system that records
streamflows on a real-time basis is also
maintained by this office, and has
become crucial in the state's flood
monitoring efforts. Additionally, the staff
acts in an advisory capacity to county
commissioners, provides advice to other
state agencies, and plans for future use
and development of the waters of the
state in conjunction with other agencies.

How can I get more information?

The Division of Water Resources is a
division of the State of Colorado
Department of Natural Resources.

Bill Owens
Governor

Greg Walcher
Executive Director

Office of the State Engineer

Hal D. Simpson, State Engineer
What does the Division of Water Resources do?

Colorado, for well over 100 years, has used a system of water distribution known as the prior appropriation doctrine. Under this doctrine, the first appropriator of water has a senior right to that water, and that right must be satisfied before any rights junior to that right can receive water. The Division of Water Resources is empowered to administer all surface and ground water rights throughout the state and ensure that this doctrine is enforced.

Obviously, the State Engineer does not do the day to day administration of all of these water rights. Most of that work is accomplished through field offices, known as the Division Engineer's Offices. Seven division offices are located throughout the state in each major drainage basin. The division offices in turn employ water commissioners who are actually out in the field, turning headgates, issuing shut down orders, collecting water use and/or diversion data, and enforcing the decrees and water laws of the State of Colorado.

For what other areas is the State Engineer responsible?

While water administration and enforcement is a major duty of the State Engineer, a host of other duties are under his responsibility. Ground water well permitting is one of those duties.

By law, every new well in the state that diverts ground water must have a well permit. In order to obtain a permit, a person must file an application for approval of a permit with the State Engineer. Over 10,000 applications are submitted for review annually and the staff determines the amount of water available and analyzes the potential for injury to other existing water rights under strict statutory guidelines.

The State Engineer also provides staff to assist in technical support to the Colorado Ground Water Commission, in the exercise of its duties in the Designated Basins, generally located on the eastern plains of Colorado. Well permits for wells located in these basins are evaluated by the staff and submitted to the Commission for approval.

Further, the State Engineer provides staff assistance for the Board of Examiners of Water Well Construction and Pump Installation Contractors. This Board oversees the safe and proper installation of well pump equipment and regulates the proper, safe construction of wells throughout the state.

The Division, in cooperation with various local ground water management districts, operates a statewide network for monitoring ground water levels. Over 1,500 wells are measured to assist in projecting ground water levels and to aid in the administration of ground water.

What does the State Engineer have to do with dams in Colorado?

Dam safety engineers review, and the State Engineer approves, plans and specifications for construction of new dams and plans for repair of existing dams. Also, the dam safety engineers determine safe storage levels in reservoirs and inspect most dams located throughout the state to ensure the safety of the public. If deficiencies are found, the State Engineer has the authority to issue repair and/or restriction orders.

What does the Division have to do with water flowing out of the state?

Waters flowing across state boundaries are apportioned through interstate compacts, Federal court decrees, and U.S. Supreme Court decisions. The State Engineer and his staff administer flows along the South Platte, Rio Grande, Republican, Costilla, Arkansas, Colorado, Laramie, North Platte and Lobo Rivers on a daily basis to make sure that Colorado is meeting the commitments set forth in those documents.

If I need information on water rights, is the Division of Water Resources the place I need to go?

In most instances, the answer is yes. The Division maintains records of streamflows, as well as water rights adjudications and well permits, plans for dams and reservoirs, water diversions,
From: 8999 Independence Way, Alamosa, CO 81101
To: Water Resources Division, 301 Murphy Dr, Alamosa, CO 81101

Type your route notes here

8999 Independence Way, Alamosa, CO 81101
