**Colorado Energy Office Issues Request for Applications to  
Build Electric Vehicle Fast-Charging Stations across the State**

**DENVER – Tuesday, April 10, 2018** – The [Colorado Energy Office](#) (CEO) today issued a Request for Applications (RFA) for the [ALT Fuels Colorado Electric Vehicle Direct Current Fast-Charging Corridors Grant Program](#). CEO will award grants to public and private entities to build EV fast-charging stations along Colorado's major transportation corridors.

This RFA directly addresses Action #1 in the [Colorado Electric Vehicle Plan](#): Build out Colorado's EV fast-charging infrastructure through public-private partnerships and in coordination with other programs. This competitive RFA is a solicitation for proposals to install EV fast-charging stations at 33 sites across the state.

The Colorado Electric Vehicle Plan was released in January 2018 in support of *Executive Order D 2017-015, Supporting Colorado's Clean Energy Transition*. The plan states that lack of EV fast-charging stations along major transportation corridors limits the ability of EV drivers to engage in intra- and interstate travel and is a major barrier for current and prospective EV owners.
