An Oil & Gas Rig Movement Permit is required prior to moving a rig within Moffat County. Be it understood by the applicant that this permit, when issued, is valid only on those county roads under the jurisdiction of Moffat County. To operate on roads under other jurisdictions, (State Highways or local streets) it is necessary to obtain a separate permit from the local authorities having jurisdiction there over. By issuing this permit, Moffat County will waive the required Oversized/Overweight Permits for the equipment shown below. The applicant is expected to meet the maximum weight limit of 20,000 lbs. on any one axle for overweight loads.

The purpose of this permit is to allow Moffat County to maintain roads impacted by oil and gas rigs above and beyond normal wear and tear. The permit fee does not cover excessive damage including but not limited to: breaking of asphalt, damage to cattleguards, culverts or bridges. This permit applies only to the truck(s) directly tied to the moving of the rig. Support equipment is not covered by this permit, (i.e. water trucks) and is required to obtain a Transport Permit for oversize/overweight loads.

Applicant certifies that they understand this permit is issued for the transport of the oil and gas rig only and a new permit must be obtained each time the rig is moved.
