RE: Request for Variance

The Pitkin Historical and Community Association has received a gift of an historic building. This is the small "stable" located on the alley adjacent to our other historic buildings on the museum property. We propose to have the building moved the short distance onto our property.

We believe that the best continuity would be for the upstream side of the buildings to be in alignment. We have discovered that this would mean that we would be two feet closer to the neighboring property than is called for in the code. We ask for a variance of these two feet.

In addition, our previous projects for which we have had a building permit had the fee for the permit waived. We request a waiver of fees on this permit as well.

Your Humble Servant,

Gerald Winget
President
