6-5-1 GENERAL PROVISIONS.

(A) All non-exempt outdoor light fixtures and illuminating devices permanently or temporarily installed outdoors, including but not limited to devices to illuminate signs, shall meet the following requirements:

(1) They shall be shielded so no light rays are emitted at angles which will allow the light to pass directly off of the premises appurtenant to the fixture.

(2) They shall be shielded so that all light rays are emitted by the installed fixture at angles below the horizontal plane.

(3) All fixtures designed to illuminate signs or structures shall be mounted above the area of the sign or structure to be illuminated.

(4) Blinking, flashing, rotating or moving lights are prohibited.

(5) Correlated color temperature (CCT) is limited to 3000 kelvin per fixture.

(6) Multi-Family Residential Sites, Mixed-Use Sites, and Non-Residential Sites shall be limited to 100,000 lumens per acre. Each lighting fixture shall be limited to 1,500 lumens. This lumen limit is established to prevent over lighting and is not intended to be achieved. Each site should use the lowest amount of lumens needed for the site to provide for safety and functionality. Amend to include a lumen limit on Single Family Residences and a lumen limit on all other uses that meets the IDA requirements for certification.

(7) Lighting for all non-residential uses shall be extinguished one hour after close of business unless there is a public safety hazard that is best mitigated by the use of lighting. Lighting intended for security purposes shall use Adaptive Controls.
