

Colorado Springs Water System

Colorado Springs Utilities
It's how we're all connected

- Complex system
- 70% comes from over Continental Divide (Colorado River)
 - 4 collection systems carry water through 4 tunnels
- Delivered by 3 pipelines, soon to be 4
- 200 miles of pipes
- Water travels up to 100 miles to the city
- 25 reservoirs used to store water

Colorado Springs Water System

LEGEND

- Existing Water System
- SDS Pipeline
- River/Creek
- Pump Stations
