¹ Breast and Cervical Cancer Program participants share a capitation rate with the remainder of the Adult population, and comprise less than 1% of that total population. As such, a separate analysis was not performed.

² The Weighted Mental Health Total is the weighted capitation rate distributed by Behavioral Health Organization (BHO) across each eligibility category based on the total number of claims processed (i.e. Elderly clients age 65 and over make up a percentage of all client claims, and each BHO services some subset of the total number of claims for Elderly clients).

³ The current organization of five BHOs was established in FY 2005-06. For fiscal years 2003-04 and 2004-05, the weighted capitation rate was derived from the three BHOs that were providing services over that span and which are still providing services under the new organizational structure.

⁴ The Department made a series of adjustment to the paid rates, beginning with a paid rate at 3% higher than the actuarial midpoint for FY 2008-09 Q3 and Q4; the rate presented is the average of the Q1 and Q2 and the actuarial midpoint (not the paid rate) of Q3 and Q4 as weighted by claims percentages. The Department paid at 2.5% lower than the midpoint for FY 2009-10 beginning in September; for January through June of 2010, two BHOs received rates carried forward from the September rates. All presented rates are of the midpoints and not the paid rates. See the narrative for a more detailed description of the policy adjustment to the rates.

⁵ The weighted rate is derived by distributing the individual rates across estimated proportion of caseload seen under the respective half years the two rates are in effect.
