# *26/TC Modifier Update*

- The TC (technical component) modifier will no longer be required on outpatient institutional claims (UB-04) for procedure codes that allow a technical and professional component split. The technical component, not the global service, will be assumed for these codes when billed on the UB-04 claim. Claims that would have their payment impacted due to the previously required TC modifier will be reprocessed with this system change.
- System change is currently in progress to accommodate this update
