<sup>1</sup> Breast and Cervical Cancer Program participants share a capitation rate with the remainder of the Low Income Adult population, and comprise less than 1% of that total population. As such, a separate analysis was not performed.

<sup>2</sup> The Weighted Behavioral Health Total is the weighted capitation rate distributed by Behavioral Health Organization (BHO) across each eligibility category based on the total number of claims processed (i.e. Adults 65 and older make up a percentage of all client claims, and each BHO services some subset of the total number of claims for Adults 65 and older).

<sup>3</sup> The Department has adjusted the rates paid to the BHOs in FY 2008-09 through FY 2010-11 due to budget actions. The numbers provided here reflect the actuarial point estimates prior to budget actions and therefore do not match the numbers in Exhibit FF, which demonstrate the actual paid rates to the BHOs.
