

APPLICABILITY CHECKLIST
Halogenated Solvent Cleaning NESHAP

NOTE: This checklist will establish whether a solvent cleaning machine/degreaser is subject to this NESHAP.

1 Background Information: The following information should be obtained **before** the Inspector visits the facility. This information can be found in the construction or operating permit(s), any reporting, or any enforcement action information for the facility, or by contacting the facility contact.

Plant ID/permit number(s): _____

Plant Name and Address: _____

Name of plant contact: _____
Telephone number: _____
Plant contact address: _____

Date of Inspection: _____

Inspector(s):	<u>Name</u>	<u>Title/Affiliation</u>	<u>Phone Number</u>
	_____	_____	_____
	_____	_____	_____
	_____	_____	_____

2 Machine and Solvent Identification

Solvent Cleaning Machine Identification Number _____

Solvent Cleaning Machine Location (within facility) _____

- _____ Is the machine a solvent cleaning machine as defined by the rule?
- A solvent cleaning machine is anything that holds solvent (greater than 2 gallons of 7.6 liters) into which parts are placed to be cleaned. If the unit is less than 2 gallons, it is only subject to this rule if it is specifically designed to clean parts (i.e., an open bucket that has a capacity of less than 2 gallons is *not* a solvent cleaning machine).
 - Almost anything can be considered a “part.” If things are put into the unit to be to be cleaned, it is likely a solvent cleaning machine.

Does the machine use one of the following halogenated solvents (the solvent must contain at least 5 percent, in total, of the following HAP solvents)?

- perchlorethylene (CAS No. 127-18-4)
- 1,1,1-trichloroethylene (CAS No. 71-55-6)
- trichlorethylene (CAS No. 79-01-6)
- methylene chloride (CAS No. 75-09-2)
- carbon tetrachloride (CAS No. 127-18-14)
- chloroform (CAS No. 67-66-3)

What is the type of the cleaning machine?

- Batch Vapor
- In-line Vapor
- In-line Cold
- Batch Cold

Is the machine a new source or existing source?

- New (installed or constructed after 11/29/93)
- Existing (installed or constructed on or before 11/29/93)

[Note: Moving a machine from one location to another within the facility does not make it a new source.]

3 Compliance Checklists

<u>For a(n):</u>	<u>Use Compliance Checklist:</u>
Batch Vapor Machine	A
In-line Machine	B
Batch cold Cleaning Machine	C
