Addendum No. 1

2016 BENNETT REPLACEMENT WELLS

Date: May 13, 2016

Owner: Town of Bennett, Colorado

The Contract Documents for the above named project are hereby revised as follows:

1. The bid opening is extended by one week until 10:30 A.M. on Monday, May 23, 2016.

2. As a point of clarification for Item 22 of the General Conditions, “Liquidated Damages”, although time is of the essence for the Work, monetary liquidate damages, as provided for in this Specification section, will not be accessed. The Owner will rely upon current and future relationship considerations that Contractor(s) will use their best efforts to complete the work in a timely manner.

3. At page 33210-1 of the Specifications, the bury depth for the pitless adapters shall be changed to 5'-0” and the vents shall extend to between 18” and 24” above finished grade.

4. The first paragraph at section 3.5, “Trenching” on page 16000-7 of the Specifications shall be changed to read “Buried conduit shall have a minimum cover of 24 18-inches and be located no closer than 5 feet 18 inches horizontal, when parallel to other buried pipelines, unless otherwise shown on the Drawings.”

5. At page 16000-7 of the specifications, “Construction Power and Lighting”, Owner will allow Contractor(s) to extend 120 VAC, single phase power, not exceeding 15 amps demand, from existing electrical outlets and utilize this power during construction at no charge.

6. At Item 5 for Proposal Item 2 on page 33210-2, and at Item 5 for Proposal Item 3 on page 33210-3 of the Specifications, API-5L pipe may be used in place of the specified EUE pipe.

7. For work at Well #3 LFH, Contractor shall use reasonable care to segregate and replace existing gravel during his performance of the Work but, beyond this, will not be responsible for importing and placing new gravel at the site upon completion of his Work.

8. It is the intent of the Contract Documents that all buried pipelines will be “restrained” through the use of mechanical joint restraint glands, bell restraints, and other similar measures.

9. Contractor shall supply and install the lightning arrester (LA) in the EUSERC switchboard shown on Sheet 3 of the Drawings. The LA shall be a MacLean Power System “Surge Tec” Z3-480 or approved equal.

10. Sheets 3 and 4 of the Drawings are hereby replaced with the attached drawings.
