

Adult Medicaid Dental Benefit Fact Sheet

Background

Historically, Medicaid has not covered dental services for adults. Lack of preventive dental coverage can contribute to a range of serious health complications and drives Medicaid costs for both emergency and medical services.

In 2013, the state legislature passed [Senate Bill 242](#) which authorized the Department to create a new limited dental benefit in Medicaid for adults age 21 and over. The new dental benefit provides Medicaid members up to \$1,000 in dental services per state fiscal year which runs from July 1 – June 30.

What the new adult dental benefit covers

The adult dental benefit is available to adult Medicaid clients (21 and over) and covers:

- Basic preventive dental exams
- Diagnostic and restorative dental services (such as x-rays and fillings)
- Extractions (tooth pulling)
- Root canals
- Crowns
- Partial dentures*
- Complete dentures*
- Periodontal scaling
- Root planing
- Other procedures requiring prior authorization will also be available.

* Partial and complete dentures are not subject to the \$1,000 cap per state fiscal year.

Colorado Medicaid Partners with DentaQuest

Colorado Medicaid has partnered with DentaQuest to help our members find a dentist and help us manage our members' dental benefits. All Colorado Medicaid members will receive a welcome packet from DentaQuest with information about dental benefit coverage, how to use dental benefits and where to get information.
