I hereby certify under penalty of law that I do not inject either fertilizers or pesticides into a closed irrigation system (chemigate).

I am informed that closed irrigation system is defined as any device or combination of devices having a hose, pipe, or other conduit, which connects directly to any source of ground water or surface water, through which water or a mixture of water and chemicals is drawn and applied for agricultural or horticultural purposes.

It does not include any hand-held hose sprayer or other similar device which is constructed so that an interruption in water flow automatically prevents any backflow to the water source and does not include stock water wells, any domestic well with a diameter of two inches or less, or a system which includes a tailwater collection pond, or any open discharge system in which the water is pumped or diverted directly into a ditch or canal in such a manner that the force of gravity at the point of discharge into the ditch or canal cannot cause water to flow back to the point from which the water was pumped or diverted.

Please list codes for the Ground Water Management District (GWMD) (if any) and county in which your non-chemigating system(s) are located. (See back of form for codes).
