Evans, CO 80620

Subject: Aguilar's Corporation, Septic Tank - Acceptance
For Use in Colorado On-site Wastewater Treatment Systems

Dear Mr. Aguilar:

Pursuant to section 43.13 of the On-site Wastewater Treatment System Regulation 5 CCR 1002-43 (Regulation 43), the Water Quality Control Division (Division) has reviewed drawings and specifications received April 13, 2015, for the following septic tanks:

- 750 gallon; two compartment septic tank
- 1000 gallon; two compartment septic tank
- 1250 gallon; two compartment septic tank
- 1500 gallon; two compartment septic tank

The Division finds the tank design to be consistent with the criteria of section 43.9 of Regulation 43. The Division also provides this acceptance of the tanks referenced above as meeting these criteria and acceptable for use in Colorado.

The materials reviewed included evidence that Aguilar's Corporation tanks are nationally certified as you are a manufacturer that participates in the Plant Certification Program of the National Precast Concrete Association (NPCA) so watertightness testing pursuant to section 43.13(G)(2) of Regulation 43 is not required. However, please provide a copy of your re-certification to the Division on an annual basis in February of each calendar year.

This acceptance does not constitute an endorsement of this product. As individual local public health agency regulations may be more stringent than Regulation 43, the Division cannot ensure the acceptance of a septic tank within any given jurisdiction.

If you have any questions regarding the Division's review or findings, please contact me at (303) 692-2366 or chuck.cousino@state.co.us.

Sincerely,

Charles J. Cousino, REHS
On-site Wastewater Treatment System Coordinator
