August stakeholder meetings notes by Steve

Try to build automation for IS to be able to have the referral options tailored to the advocacy organizations in a particular area

Agreed to have a group of individuals with disabilities role play the IS screen. Julie will be recruiting the participants. HCBS Strategies will be recruiting the CMs.

Revise SIS table and write training language so that it is consistent with an approach in which the CM reviews the SIS scoring and notes and uses this information.

Spilt in the opinion about the use of the SIS tool to inform the new assessment tool.
