

# PARACHUTE TOWN OF 2017 Drinking Water Quality Report For Calendar Year 2016

*Public Water System ID:* CO0123602

**Esta es información importante. Si no la pueden leer, necesitan que alguien se la traduzca.**

We are pleased to present to you this year's water quality report. Our constant goal is to provide you with a safe and dependable supply of drinking water. Please contact MARK KING at 970-285-7630 with any questions about the Drinking Consumer Confidence Rule (CCR) or for public participation opportunities that may affect the water quality.

## **General Information**

All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (1-800-426-4791) or by visiting <http://water.epa.gov/drink/contaminants>.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immunocompromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV-AIDS or other immune system disorders, some elderly, and infants can be particularly at risk of infections. These people should seek advice about drinking water from their health care providers. For more information about contaminants and potential health effects, or to receive a copy of the U.S. Environmental Protection Agency (EPA) and the U.S. Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and microbiological contaminants call the EPA Safe Drinking Water Hotline at (1-800-426-4791).

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity. Contaminants that may be present in source water include:

- Microbial contaminants:** viruses and bacteria that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants:** salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides:** may come from a variety of sources, such as agriculture, urban stormwater runoff, and residential uses.
- Radioactive contaminants:** can be naturally occurring or be the result of oil and gas production and mining activities.
- Organic chemical contaminants:** including synthetic and volatile organic chemicals, which are byproducts of industrial processes and petroleum production, and also may come from gas stations, urban storm water runoff, and septic systems.

In order to ensure that tap water is safe to drink, the Colorado Department of Public Health and Environment prescribes regulations limiting the amount of certain contaminants in water provided by public water systems. The Food and Drug Administration regulations establish limits for contaminants in bottled water that must provide the same protection for public health.

## **Lead in Drinking Water**

If present, elevated levels of lead can cause serious health problems (especially for pregnant women and young children). It is possible that lead levels at your home may be higher than other homes in the community as a result of materials used in your home's plumbing. If you are concerned about lead in your water, you may wish to have your water tested. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. Additional information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline (1-800-426-4791) or at <http://www.epa.gov/safewater/lead>.

## **Source Water Assessment and Protection (SWAP)**

The Colorado Department of Public Health and Environment has provided us with a Source Water Assessment Report for our water supply. For general information or to obtain a copy of the report please visit <http://wqcdcompliance.com/ccr>. The report is located under "Source Water Assessment Reports", and then "Assessment Report by County". Select GARFIELD County and find 123602; PARACHUTE TOWN OF or by contacting MARK KING at 970-285-7630. The Source Water Assessment Report provides a screening-level evaluation of potential contamination that ***could*** occur. It ***does not*** mean that the contamination ***has or will*** occur. We can use this information to evaluate the need to improve our current water treatment capabilities and prepare for future contamination threats. This can help us ensure that quality finished water is delivered to your homes. In addition, the source water assessment results provide a starting point for developing a source water protection plan. Potential sources of contamination in our source water area are listed on the next page.

Please contact us to learn more about what you can do to help protect your drinking water sources, any questions about the Drinking Water Consumer Confidence Report, to learn more about our system, or to attend scheduled public meetings. We want you, our valued customers, to be informed about the services we provide and the quality water we deliver to you every day.

### Our Water Sources

<u>Source</u>	<u>Source Type</u>	<u>Water Type</u>	<u>Potential Source(s) of Contamination</u>
SPRING NO 01	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 02	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 03	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 04	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 05	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 06	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 07	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 08	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 09	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 10	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 11	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 12	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 13	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 15	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 16	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 17	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 18	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 19	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles
SPRING NO 20	Well	Groundwater UDI Surface Water	Pasture Hay, Evergreen Forest, Septic Systems, Oil/Gas wells, Road miles

EMERGENCY CONNECT WITH BATTLEMENT MESA	Consecutive Connection	Surface Water	Commercial/ Industrial/ Transportation, High Intensity Residential, Low Intensity Residential, Urban Recreational grasses, Quarries/ Strip mines/ gravel pits, Row crops, Pasture hay, Deciduous forest, Evergreen forest, Mixed forest, Septic systems, Oil/ Gas wells, Road miles.
COLORADO RIVER	Intake	Surface Water	Commercial/ Industrial/ Transportation, High Intensity Residential, Low Intensity Residential, Urban Recreational grasses, Quarries/ Strip mines/ gravel pits, Row crops, Pasture hay, Deciduous forest, Evergreen forest, Mixed forest, Septic systems, Oil/ Gas wells, Road miles.

## Terms and Abbreviations

- **Maximum Contaminant Level (MCL)** – The highest level of a contaminant allowed in drinking water.
- **Treatment Technique (TT)** – A required process intended to reduce the level of a contaminant in drinking water.
- **Health-Based** – A violation of either a MCL or TT.
- **Non-Health-Based** – A violation that is not a MCL or TT.
- **Action Level (AL)** – The concentration of a contaminant which, if exceeded, triggers treatment and other regulatory requirements.
- **Maximum Residual Disinfectant Level (MRDL)** – The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.
- **Maximum Contaminant Level Goal (MCLG)** – The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- **Maximum Residual Disinfectant Level Goal (MRDLG)** – The level of a drinking water disinfectant, below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
- **Violation (No Abbreviation)** – Failure to meet a Colorado Primary Drinking Water Regulation.
- **Formal Enforcement Action (No Abbreviation)** – Escalated action taken by the State (due to the risk to public health, or number or severity of violations) to bring a non-compliant water system back into compliance.
- **Variance and Exemptions (V/E)** – Department permission not to meet a MCL or treatment technique under certain conditions.
- **Gross Alpha (No Abbreviation)** – Gross alpha particle activity compliance value. It includes radium-226, but excludes radon 222, and uranium.
- **Picocuries per liter (pCi/L)** – Measure of the radioactivity in water.
- **Nephelometric Turbidity Unit (NTU)** – Measure of the clarity or cloudiness of water. Turbidity in excess of 5 NTU is just noticeable to the typical person.
- **Compliance Value (No Abbreviation)** – Single or calculated value used to determine if regulatory contaminant level (e.g. MCL) is met. Examples of calculated values are the 90<sup>th</sup> Percentile, Running Annual Average (RAA) and Locational Running Annual Average (LRAA).
- **Average (x-bar)** – Typical value.
- **Range (R)** – Lowest value to the highest value.
- **Sample Size (n)** – Number or count of values (i.e. number of water samples collected).
- **Parts per million = Milligrams per liter (ppm = mg/L)** – One part per million corresponds to one minute in two years or a single penny in \$10,000.
- **Parts per billion = Micrograms per liter (ppb = ug/L)** – One part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.
- **Not Applicable (N/A)** – Does not apply or not available.
- **Level 1 Assessment** – A study of the water system to identify potential problems and determine (if possible) why total coliform bacteria have been found in our water system.
- **Level 2 Assessment** – A very detailed study of the water system to identify potential problems and determine (if possible) why an E. coli MCL violation has occurred and/or why total coliform bacteria have been found in our water system on multiple occasions.

## Detected Contaminants

PARACHUTE TOWN OF routinely monitors for contaminants in your drinking water according to Federal and State laws. The following table(s) show all detections found in the period of January 1 to December 31, 2016 unless otherwise noted. The State of Colorado requires us to monitor for certain contaminants less than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year, or the system is not considered vulnerable to this type of contamination. Therefore, some of our data, though representative, may be more than one year old. Violations and Formal Enforcement Actions, if any, are reported in the next section of this report.

**Note:** Only detected contaminants sampled within the last 5 years appear in this report. If no tables appear in this section then no contaminants were detected in the last round of monitoring.

**Disinfectants Sampled in the Distribution System**

**TT Requirement:** At least 95% of samples per period (month or quarter) must be at least 0.2 ppm OR  
 If sample size is less than 40 no more than 1 sample is below 0.2 ppm  
**Typical Sources:** Water additive used to control microbes

Contaminant Name	Sample Date	Results	Number of Samples Below Level	Sample Size	TT Violation	MRDL
Chlorine	December, 2016	<u>Lowest period</u> percentage of samples meeting TT requirement: 100%	0	2	No	4.0 ppm

**Lead and Copper Sampled in the Distribution System**

Contaminant Name	Time Period	90 <sup>th</sup> Percentile	Sample Size	Unit of Measure	90 <sup>th</sup> Percentile AL	Sample Sites Above AL	90 <sup>th</sup> Percentile AL Exceedance	Typical Sources
Copper	06/11/2014 to 06/11/2014	0.55	10	ppm	1.3		No	Corrosion of household plumbing systems; Erosion of natural deposits
Lead	06/11/2014 to 06/11/2014	1.8	10	ppb	15		No	Corrosion of household plumbing systems; Erosion of natural deposits

**Disinfection Byproducts Sampled in the Distribution System**

Name	Year	Average	Range Low – High	Sample Size	Unit of Measure	MCL	MCLG	Highest Compliance Value	MCL Violation	Typical Sources
Total Haloacetic Acids (HAA5)	2016	8.53	2.2 to 13	6	ppb	60	N/A		No	Byproduct of drinking water disinfection
Total Trihalomethanes (TTHM)	2016	32.95	12.8 to 52.8	6	ppb	80	N/A		No	Byproduct of drinking water disinfection

**Disinfectants Sampled at the Entry Point to the Distribution System**

Contaminant Name	Year	Number of Samples Above or Below Level	Sample Size	TT/MRDL Requirement	TT/MRDL Violation	Typical Sources
Chlorine / Chloramine	2016	0	4307	TT = No more than 4 hours with a sample below 0.2 MG/L	No	Water additive used to control microbes

**Summary of Turbidity Sampled at the Entry Point to the Distribution System**

Contaminant Name	Sample Date	Level Found	TT Requirement	TT Violation	Typical Sources
Turbidity	May	<u>Highest single</u> measurement: 0.09 NTU	Maximum 0.5 NTU for any single measurement	No	Soil Runoff
Turbidity	December	<u>Lowest monthly</u> percentage of samples meeting TT requirement for our technology: 100 %	In any month, at least 95% of samples must be less than 0.1 NTU	No	Soil Runoff

**Inorganic Contaminants Sampled at the Entry Point to the Distribution System**

Contaminant Name	Year	Average	Range Low – High	Sample Size	Unit of Measure	MCL	MCLG	MCL Violation	Typical Sources
Arsenic	2016	2.4	0 to 4.8	2	ppb	10	0	No	Erosion of natural deposits; runoff from orchards; runoff from glass and electronics production wastes
Barium	2016	0.1	0.05 to 0.15	2	Ppm	2	2	No	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits.
Fluoride	2016	0.1	0 to 0.19	2	ppm	4	4	No	Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
Nitrate	2016	0.64	0.28 to 1	2	ppm	10	10	No	Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits
Selenium	2016	1.28	0.96 to 1.6	2	ppb	50	50	No	Discharge from petroleum and metal refineries; erosion of natural deposits; discharge from mines

**Secondary Contaminants\*\***

\*\*Secondary standards are non-enforceable guidelines for contaminants that may cause cosmetic effects (such as skin, or tooth discoloration) or aesthetic effects (such as taste, odor, or color) in drinking water.

Contaminant Name	Year	Average	Range Low – High	Sample Size	Unit of Measure	Secondary Standard
Sodium	2016	93.75	42.5 to 145	2	ppm	N/A

**Violations, Significant Deficiencies, Backflow/Cross-Connection, and Formal Enforcement Actions**

**Violations**

Name	Category	Time Period	Health Effects	Compliance Value	TT Level or MCL
PLANS AND SPECIFICATIONS RULE	STATE MONITORING – NON-HEALTH-BASED	04/14/2016 – Open	N/A	N/A	N/A

**Significant Deficiencies**

Date Identified	Deficiency Description	Estimated Completion Date	Estimated Completion Date
3/16/2016	R540 - DESIGN APPROVAL; System has not received plans and specs approval for the system or for renovations to the system, including the addition of new sources, changes in treatment or changes in the distribution system. This is an alleged violation of CPDWR 1.1;	Westwater Engineering has prepared the required design engineering for design submission to the Colorado Department of Public Health and Environment (CDPHE) for the chlorination system in question. The Town has submitted the appropriate requirements and is awaiting design approval from the Colorado Department of Public Health and Environment (CDPHE)	The Town anticipates resolution soon.

## IMPORTANT NOTIFICATION REGARDING YOUR DRINKING WATER

Town of Parachute, Colorado

Colorado Department of Public Health and Environment (CDPHE)

Notification Requirements Not Met

A drinking water violation was recently identified by the Colorado Department of Public Health and Environment. This violation did not create a public health risk. However, as our customers, you have a right to be notified of this violation and made aware of what the Town of Parachute has done to rectify and comply with the Colorado Department of Public Health and Environment (CDPHE).

In 2012 the Town of Parachute upgraded the chlorination system at the Revel Springs raw water collection and chlorination facility. The upgrade converted the facility to a sodium hypochlorite feed system liquid chlorine. The best available system on the market with a significantly more reliable and controllable chlorination process. This upgrade was achieved without proper design engineering submitted and appropriate approvals from the Colorado Department of Public Health and Environment (CDPHE). The Town has submitted the appropriate requirements and is currently waiting for design approval from the Colorado Department of Public Health and Environment (CDPHE).

**The quality of your drinking water was at no time affected by this violation.** The Colorado drinking water program requires notification prior to construction and upgrade of all public health facilities. However, due to an oversight, the Town failed to submit the required notification as required.

### What this means to you? What should you do?

- o There is no action needed by you at this time. Should a situation arise when the water is not safe to drink, you **WILL** be notified within 24 hours.

### What is being done?

- o Westwater Engineering was hired to prepare the required design engineering for design submission to the Colorado Department of Public Health and Environment (CDPHE) for the chlorination system in question. The Town is currently awaiting the design approval.

The Town anticipates resolution of the problem soon. For more information regarding this violation and resolution, please contact Mark King at [mking@parachutecolorado.com](mailto:mking@parachutecolorado.com), call (970) 285-7630 or write to the Town at 222 Grand Valley Way, Parachute, CO 81635.

*\*Please share this information with all those in your household along with friends, family and those who may not have received this notice directly (i.e. water services to apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.\**

Notification provided by the Town of Parachute - CO0123602

Distribution date: **March, 2017**

Este informe contiene información muy importante sobre su agua potable. Si necesita mas informacion, por favor contacte a Lucy Cordova (970) 285-7630, ext 104.
