

CFC

- Have worked with mission analytics to do a feasibility report. Still at the very beginning of the overall process. Looking at costs, what it would look like, and what services would be included.
- Department is committed to moving it forward, but it has stalled in legislature.
- Looking at nurse practice act and children under waiver and also looking at related caregivers.
- Do have an overall view of the state wide system of change and how important the assessment will be.

CDASS/IHSS

- Programmatic changes have been made for about the past two years based on a workplan developed with stakeholders
- IHSS is just getting started on the programmatic changes
- Looking to expand both programs to other populations and waivers
- Looking to use CFC as a vehicle to expand consumer direction.
- IHSS has an itemized checklist in of what tasks you need help with and how long it takes in addition to the 100.2; not a consumer friendly way
- Have three forms for IHSS care plan development, and want to make the care plan an assessment rather than an alternative to the service plan.
- *Candy will send workplan for CDASS and IHSS*
- Case managers have not been monitoring as they have needed to.
- Want to do more training with CM around intake process roles
