Preface

This Companion Guide to the Health Care Claim Status Request and Response (276/277) adopted under Health Insurance Portability and Accountability Act (HIPAA) clarifies and specifies the data content when exchanging electronically with the Colorado DHCPF. Transmissions based on this Companion Guide, used in tandem with the **ASC X12N 276/277 005010X212 Implementation Guide**, are compliant with both ASC X12 syntax and those guides. This Companion Guide is intended to convey information that is within the framework of the ASC X12N Implementation Guides adopted for use under HIPAA. The Companion Guide is not intended to convey information that in any way exceeds the requirements or usages of data expressed in the Implementation Guides.

APPENDIX 1: Frequently Asked Questions .................................................................................... 16

APPENDIX 2: Change Summary ..................................................................................................... 17
1. INTRODUCTION

The Health Insurance Portability and Accountability Act (HIPAA) of 1996 carries provisions for administrative simplification. This requires the Secretary of the Department of Health and Human Services (DHHS) to adopt standards to support the electronic exchange of administrative and financial health care transactions primarily between health care providers and plans. HIPAA directs the Secretary to adopt standards for transactions to enable health information to be exchanged electronically and to adopt specifications for implementing each standard. HIPAA serves to:

- Create better access to health insurance
- Limit fraud and abuse
- Reduce administrative costs

The HIPAA regulations at 45 CFR 162.915 require that covered entities not enter into transaction partner agreement that would do any of the following:

- Change the definition, data condition, or use of a data element or segment in a standard
- Add any data elements or segments to the maximum defined data set
- Use any code or data elements that are marked “not used” in the standard’s implementation specification or are not in the standard’s implementation specifications
- Change the meaning or intent of the standards implementation specifications

Effective January 1, 2013, health plans, covered entities and their business associates that engage in the exchange of claim status transaction are required by the Affordable Care Act (ACA) to comply with additional operating rule regulations for the 276/277 transactions. These operating rules are maintained by the Council for Affordable Quality Healthcare (CAQH) Committee on Operating Rules for Information Exchange (CORE).

SCOPE

The Companion Guide is to be used with, and to supplement the requirements in the HIPAA Accredited Standards Committee (ASC) X12 Implementation Guides and CORE Rules, without contradicting those requirements. Implementation Guides define the national data standards, electronic format, and values for each data element within an electronic transaction. The purpose of the Companion guide is to provide trading partners with a guide to communicate Colorado DHCPF specific information required to successfully exchange transactions.

The Companion Guide is intended for the business and technical users, within or on behalf of trading partners, responsible for the testing and setup of electronic claim status request and response transactions to Colorado DHCPF.

OVERVIEW

This section of the Companion Guide will provide guidance for establishing a relationship with Colorado DHCPF for the business purpose of doing the electronic Health Care Claim Status Request and Response (276/277) transaction.

REFERENCES

This section specifies additional on-line sources of helpful information related to electronic data interchange and X12 transactions.

Affordable Care Act (ACA) Section 1104 information is at the Centers for Medicare & Medicaid Services (CMS) website. For information on ACA Administrative Simplification information follow this link: http://www.cms.gov/Regulations-and-Guidance/HIPAA-Administrative-Simplification/Affordable-Care-Act/index.html?redirect=/Affordable-Care-Act/02_OperatingRulesforHIPAATransactions.asp

ADDITIONAL INFORMATION

It is assumed that the trading partner has purchased and is familiar with the ASC X12 Type 3 Technical Report (TR3) being referenced in this Companion Guide. TR3s can be purchased from the ASC X12 store at http://store.x12.org/store/.

2. GETTING STARTED

TRADING PARTNER REGISTRATION

Any entity intending to exchange electronic transactions with Colorado DHCPF must agree to the Colorado DHCPF Trading Partner Agreement at the end of the Trading Partner Profile process. A Trading Partner Profile can be completed using the Colorado Medicaid Web Portal link at: https://colorado-hcp-portal.xco.dcs-usps.com/hcp/provider.

NOTE: Providers must be enrolled and approved before registering as a Trading Partner.

The Colorado Medicaid Web Portal will include the ability for file and report retrieval. Billing Agents and clearinghouses will have the option of retrieving the transaction responses and reports themselves and/or allowing each individual provider the option of retrieval. The trading partner will access the system using their assigned login and password. For information on the Colorado Medicaid Web Portal, go to: https://colorado-hcp-portal.xco.dcs-usps.com/hcp/provider.

CERTIFICATION AND TESTING OVERVIEW

All covered entities who submit electronic transactions are required to certify. This includes Clearing houses, Software Vendors, Provider Groups, and Managed Care Organizations (MCOs). If you submit your transactions through one of these agencies, they will certify on your behalf. However, if you submit transactions directly, you will need to certify. If you submit your transactions through an MCO, you should receive information from the MCO with certification requirements.

Results of the system’s processing of your transactions are reviewed and communicated back via email. Once the test files all pass, a production ID and welcome letter will be sent confirming certification.

3. TESTING WITH THE PAYER

This section contains a detailed description of the testing phase.

Testing is required for the Health Care Claims Status Request and Response (276/277).
Before exchanging production transactions with Colorado DHCPF, each trading partner must complete production authorization testing.

Trading partner testing includes HIPAA compliance testing as well as validating the use of conditional, optional, and mutually defined components of the transaction.

Colorado DHCPF recommends that trading partners submit three successful and unique submissions and receive the associated 999 (accepted) acknowledgement in response in order to obtain approval from Colorado DHCPF to promote to Production.

Questions may be directed to the EDI Helpdesk at 1 (844) 235-2387 or via the Contact Us link at the top of the Portal home page at:  https://colorado-hcp-portal.xco.dcs-usps.com/hcp/provider.

4. CONNECTIVITY WITH THE PAYER/COMMUNICATIONS

PASSWORDS

Passwords are provided during initial enrollment and can be reset by contacting Provider Relations – Electronic Claims Submission (ECS) Department at 1 (844) 235-2387. These passwords may not be shared.

Colorado.gov/HCPF/EDI-Support

5. CONTACT INFORMATION

WORKING WITH COLORADO DHCPF

Colorado DHCPF, in an effort to assist the community with their electronic data exchange needs, has the following options available for either contacting a help desk or referencing a website for further assistance:

For general information to go Colorado DHCPF Website: https://www.colorado.gov/hcpf

EDI SERVICES

For EDI support, please contact the Provider Services Call Center at: 1-844-235-2387.

Provider Services Call Center Hours of Operation:

7 a.m. – 5 p.m. MT Monday, Tuesday & Thursday
10 a.m. – 5 p.m. MT Wednesday & Friday.

6. OL SEGMENTS/ENVELOPES

ISA-IEA

This section describes the use of the interchange control segments. It includes a description of expected sender and receiver codes, authorization information, and delimiters. (See Section 10 below, Transaction Specific Information)
GS-GE

This section describes the use of the functional group control segments. It includes a description of expected application sender and receiver codes. Also included in this section is a description concerning how Colorado DHCPF expects functional groups to be sent and how Colorado DHCPF will send functional groups. These discussions will describe how similar transaction sets will be packaged and Colorado DHCPF use of functional group control numbers. (See Section 10 below, Transaction Specific Information)

ST-SE

This section describes the use of transaction set control numbers. (See Section 10 below, Transaction Specific Information)

Transactions (ST-SE envelopes) are limited to a maximum of 5000 CLM segments.

7. PAYER SPECIFIC BUSINESS RULES AND LIMITATIONS

Payer specific business rule information regarding Colorado DHCPF can be found at the For Our Providers webpage on the Colorado DHCPF website, http://www.colorado.gov/hcpf/our-providers

Colorado DHCPF interChange will use, if supplied in the X212 Claim Inquiry, all of the following values in a search for claims:
- Billing provider ID
- Member ID
- Payer ID
- Dates of service
- Total billed amount (AMT02)
- Patient control number (patient account number)
- Institutional bill type
- Internal control number (ICN)

The minimum values that must be present are:
- Billing provider ID
- Member ID
- Payer ID
- Dates of service

Colorado DHCPF strongly recommends that as many “possible values” be included to help narrow the number of matches in the search.

If there is not an exact match found for a claim identifier, the system will not return claims that closely match or are in the same date range.

If the AMT segment is submitted it will be used as one of the primary searches when selecting claims to include on the response. Only claims that have an exact dollar amount match will be returned.

Colorado DHCPF provides claim status information at the claim level for dental, institutional, and professional claims.
Colorado DHCPF requires the loop 2000D DMG segment. This segment is always required because the subscriber is always the patient.

Colorado DHCPF does not support the Dependent Loop since all interChange members can be uniquely identified at the Subscriber level (loop 2000D).

Colorado DHCPF does not support service line-specific status requests. When sent, this data will be ignored and the request will be processed using the claim level data.

Colorado DHCPF recommends that no more than 99 requests per batch transmission be made at one time for a variety of reasons. Processing of small batches is more efficient and submitters are less likely to receive rejections on smaller batch bundles. This is only a recommendation as there is no max limitation within the query code.

8. ACKNOWLEDGEMENTS AND/OR REPORTS

The acknowledgement process will create the TA1 and 999 acknowledgement for the 270 transactions. No acknowledgements are expected for the 271 transactions.

9. TRADING PARTNER AGREEMENTS

An Electronic Data Interchange (EDI) Trading Partner is defined as any Colorado DHCPF customer (provider, billing service, software vendor, employer group, financial institution, etc.) that transmits to, or receives electronic data from, Colorado DHCPF.

Payers have EDI Trading Partner Agreements (TPA) that accompany the standard Implementation Guide to ensure the integrity of the electronic transaction process. The Trading Partner Agreement is related to the electronic exchange of information, whether the agreement is an entity or a part of a larger agreement, between each party to the agreement.

10. TRANSACTION SPECIFIC INFORMATION

This section describes how ASC X12N Implementation Guides (IGs) adopted under HIPAA will be detailed with the use of a table. The tables contain a row for each segment that Colorado DHCPF has something additional, over and above, the information in the IGs. That information can:

1. Limit the repeat of loops, or segments
2. Limit the length of a simple data element
3. Specify a sub-set of the IGs internal code listings
4. Clarify the use of loops, segments, composite and simple data elements
5. Any other information tied directly to a loop, segment, composite or simple data element pertinent to trading electronically with Colorado DHCPF

In addition to the row for each segment, one or more additional rows are used to describe Colorado DHCPF usage for composite and simple data elements and for any other information. Notes and comments should be placed at the deepest level of detail. For example, a note about a code value should be placed on a row specifically for that code value, not in a general note about the segment.

All Colorado DHCPF members are considered “subscribers” so they all have individual loops. See the Implementation Guide for additional information. Dependent loops for eligibility transactions will not be processed.

TPID – This is the number that is assigned to the provider/submitter to uniquely identify their electronic
transaction. This may also be referred to as the Electronic Claim Submission (ECS) number or Trading Partner ID.

APPENDIX 1: Frequently Asked Questions

Q1: Can I send each Health Care Claim Status Request and Response (276) transaction to Medicaid without selecting the transaction on my Trading Partner Agreement?

A1: No. All Trading Partners must have signed a Trading Partner Agreement and be set up for the transaction types agreed upon.
